

**Date – 30/Nov/2012**

Minutes of the IEEE-1149.1 Working Group Friday meeting

**Attendees:**

Brian Turmelle  
Francisco Russi  
Carl Barnhart  
Craig Stephan  
CJ Clark  
Roland Latvala  
Dave Dubberke  
Li Hui  
Dharma Konda  
Peter Elias

**Meeting called to order at 9:40 am MST**

**Current Draft:** Recirc draft

**The agenda for the meeting today:**

- Discussion of recirculation draft

**Meeting**

Meeting lightly attended today with 10 members present.

CJ discussed some feedback received, some from outside the group:

- Catherine Berger (sp?) from the IEEE gave feedback about adding a 'Box' around 'Caution' statements.
- Phillip Lebourg (sp?) warned about not changing the length of scan chains during shift. CJ and Carl added that although not explicitly stated in a rule, we already have other rules that in context of the Std do not allow this. So this shouldn't be a real concern. Example the select cells have update stage, and no select change while sel field scanning.

CJ commented on iGet ready only, in that a force read only iGet could be in a future standard revision like Wim wants.

- Peter said they would reconsider it, but he didn't want to go into details now. He didn't want to reexplain it again since it had been ongoing for past 6 months already.

Francisco asked about P1687 scan portal proposal vs. JTAG port.

- CJ didn't think that affected our dot1 Std, but mentioned he voted no on that P1687 motion. Vendors must be 1149.1 compliant, and P1687 will muddy the

waters if you don't know what you will get when there are multiplexed scan ins/outs.

**Meeting adjourned early: ~10:15am MST**

**Action Items:**

- Recirc draft to be sent back out with editorial cleanups and 10 day clock restarted.

**Next Friday Meeting:**

- Next Friday meeting is on 07-Dec-12. (Check with Carol on this).
