

1394b BPORT Task group report

Newport Beach 29 April 1998

Work covered at this meeting:

1. New synchronization procedure – explanation of how synchronization works when the new control coding is used (i.e. the scheme presented by Eric Deliot at the last meeting.)
2. Do we adopt the new control coding scheme – consensus reached to add this to draft.

Status of task group:

- New draft is on the web site, much more up to date than the chapter in draft 0.10.
- Open issues: request type mappings, test modes and test patterns.
- Next steps: review draft, especially c-code
- Liaise with the accelerations group on c-code nomenclature etc.
