Wall Time used by the talker to synthesize avtp_timestamp

1722 Frame 1 (the frame contains 16 bit, LPCM mono audio data)

1722 Frame 2 (the frame contains 16 bit, LPCM mono audio data)

1722 Frame 3 (the frame contains 16 bit, LPCM mono audio data)

Falling edge triggers audio sample capture

Wall Time must be captured within +x/-y ns of audio capture trigger
