Electronic Document Distribution Trial

- 
- 
- Evaluation Report
- Darwin Engwer, Netwave Technologies

Mediums

- Flash disk
- LAN
  - WLAN
  - Ethernet
Flash disk

- worked extremely well
- most members could use it
- fast data transfer
- only one “mishap”

LAN

- Setup
- Usage
LAN Setup

- WLAN setup was very easy (!)
- Server setup (Win95) was difficult and troublesome
  - all problems were eventually resolved
  - many thanks to Stuart and Bob O. for their help

LAN Setup

- Workstation setup
  - easy in most cases
  - as predicted, sometimes it was tricky
  - only one computer could not be set up
    - too many devices already installed
  - no computers were impaired by the installation process
LAN Usage

• Very convenient for those who choose to install
• Immediate access to new documents
• Nice backup solution for those members who could not use the flash disk
• Peer-to-peer file sharing between members was also common (an unexpected benefit)

Office Printing Experiment

• limited success due to lack of a real server
