The following comments were resolved by the ballot resolution group.

Comments requesting the elimination of FH Interoperability mode were all **REJECTED** by vote of the full Task Group. These are comments 8, 20, 24, 90, 108, 145.

Comments requesting that FH Interoperability mode be made interoperable with basic HR/DSSS operation were all **ACCEPTED**. The resolution of these comments was to make small changes to the MAC, MAC Management and PHY MIB, as well as to eliminate much of the current FH related text from the HR/DSSS draft. These are comments 12, 16, 20, 42, 81, 84, 86, 87, 88, 92, 106.

Comments requesting changes to and clarification of Tables 1 and 2 were all **REJECTED**. The resolution to these comments was to delete the tables. These are comments 17, 18, 19, 23, 26, 27, 28, 29, 35, 36, 37, 38, 115, 116, 147, 148, 149, 153, 158.

Comment 33 was rendered redundant by the change to the FH Interoperability Mode.

Comment 76, regarding confusion between the use of MPDU and PSDU was accepted.

Comment 77, regarding MAC Management functionality, was accepted. The relevant text was moved to clause 11.

Comment 144, regarding an incompatible hopping set, was rejected. The commenter did not correctly understand the operation of the hopping set.
