Anil Sanwalka changed his vote to Approve w/o comments, Bob Ward approved the response to comment 59

And Stan Reible responded;

I did vote Yes/ Approve on the 802.11a sponsor ballot.

Even, if I don't agree with that particular specification, it was not a overriding concern on my part as expressed by my overall Yes vote.

If we need to confirm that 802 Standards, or the work of Standard's Committees are 100% perfect, then I do have a problem with that. I think that God has the final say on that.

Report of votes: (A = Approve w/o comments, AC = Approve with comments, D = Disapprove with comments,
 XT = Abstain due to lack of time, AE = Abstain due to lack of expertise,
 XO = Abstain for other reason)
