

ERRATA REQUEST

Requested by:	Company:	E-mail address:	Date of Request
Thomas Muller	Nokia Mobile Phones	thomas.t.muller@nokia.com	2000-03-14

Bluetooth SPECIFICATION V 1.0 B profile

Part:	Page:	Section:	Paragraph:
Part K:7 Dial-up Networking Profile	238	6.1	Table 6.1

Owner of part:	Status/date:	Class of request:	ID No.:	Approved:
Olof Dellien	Closed(Mem.) / 2000-03-15	Corrections	K:7_Corr01	rui sun

Problem Statement (and / or exiting text)

Dial-up Networking Profile:

a) In the section on Generic Access, two modes for inquiry are required for the gateway,

i.e. non-discoverable and general-discoverable modes are both mandatory.

b) In the section on Generic Access, two modes for pairing are required for the gateway,

i.e. non-pairable and pairable modes are both mandatory.

There is no real interoperability issue in making non-discoverable and non-pairable modes mandatory.

Making them mandatory, however, puts requirements on the user interface of the gateway.

This is against the intention to make this profile work for modems.
