Hi All

**This is a MANDATORY letter ballot for all IEEE 802.15 voters of record of as of April 10, 2020. Ballot Closes on April 20, 5pm ET.**

IEEE 802.15 Voting members have an obligation to vote. Not returning two valid letter ballots in a sequence of three letter ballots may terminate your voting rights.

**DO NOT LOSE YOUR VOTING RIGHTS BY FORGETTING TO VOTE!**

One of two remaining ballots, both on 802.15.13 OWC. This one is for a PAR title change

From: **Multi-Gigabit per Second Optical Wireless Communications (OWC) with Ranges up to 200 meters**  
To: Multi-Gigabit per Second Optical Wireless Communications (OWC), with Ranges up to 200 meters, for both stationary and mobile devices

Reason for the change: For improved clarity and ease of seeing what is in the Standard, the Task Group felt the two main classes of application should be explicitly mentioned in the title

NOTE: I am unable to include a draft of the modification at this time due to a MyProject glitch.

Motion: *that the 802.15 WG requests approval from the EC to modify the PAR title of 15-17-0076-04-0000\_Multi-Gigabit OWC PAR, to the above, Including the explanatory note and to submit to NesCom.*

Moved: Volker Jungnickel  
Second: Rick Alfvín
