Re: P802.15 Standard for Telecommunications and Information Exchange Between
Systems – LAN/MAN – Specific Requirements - Part 15: Wireless Medium
Access Control (MAC) and physical- layer (PHY) specifications for
Wireless Personal Area Networks (WPAN)
P802.16 Standard for Telecommunications and Information Exchange Between
Systems – LAN/MAN Specific Requirements – Air Interface for Fixed
Broadband Wireless Access Systems

Dear Mr. Carlo:

I am pleased to inform you that on 18 March 1999 the IEEE-SA Standards Board approved the above referenced projects. A copy is enclosed for your files.

We are also enclosing the IEEE Standards Kit Phase 2 (After PAR Approval). This kit includes items which you may find useful in the development of your proposed standard and submitting your final draft for approval. Written responses from all committees/organizations listed on the PAR as proposed coordination must be included with the final draft when it is submitted.

If coordination is effected by common membership, i.e., a person on the standard's developing committee who is also a member of the committee/organization specified on the PAR for coordination, there must be a document included with the final draft from that coordinating body which states that person is authorized to represent it. We strongly recommend that a copy of your draft be sent to this office for review prior to the final voting by the working group to allow for a quick review by the editorial staff before sponsor balloting.

If you should have any further questions, please contact me at 732-562-3808 or by email at r.kershner@ieee.org.

Sincerely,

Rona Kershner

Manager, Standards Board Support
NesCom Secretary
