Roger B. Marks
Chair, IEEE 802.16 Working Group
r.b.marks@ieee.org
29 July 2010

Dear P802.16m Balloting Group:

Thank you for your participation in the recirculation of P802.16m/D6, which ran from 9 June to 9 July 2010. Prior to comment resolution, the numerical results were 152 Approve, 107 Disapprove with Comment, and 16 Abstain.

Comments were resolved by the IEEE 802.16 Working Group during its Session #68 in July. We have uploaded the resolutions to the IEEE-SA myBallot system. In addition to the 665 comments submitted through myBallot, the 802.16 Working Group received another 339 comments directly; the latter are not associated with Disapprove votes. The Working Group has posted the full documentation regarding the resolution of all of these comments, along with the editor's implementation notes, in document IEEE 802.16-10/0040r3 at <http://ieee802.org/16/docs/#10_0040>. In that file, the myBallot comments are numbered 1-665, corresponding to the myBallot numbers; the additional comments are numbered 10001-10339. Note that some changes refer to documents contributed directly to the 802.16 Working Group. These are available at <http://ieee802.org/16/tgm#contrib>.

We are requesting that the IEEE Balloting Center initiate a recirculation of the new draft P802.16m/D7. For your reference, we are also including file *P80216m_D7delta.pdf* indicating the changes with respect to draft D6. The baseline for the amendment is IEEE Std 802.16. We have previously provided to you IEEE Std 802.16-2009 and the amendment IEEE Std 802.16j-2009. On 17 June 2010, the IEEE-SA Standards Board approved the new amendment IEEE Std 802.16h-2010. We are providing a prepublication version to you as well.

Please take this opportunity to review the material. Since this is a recirculation ballot, you need respond only if you wish to change your initial vote or submit additional comments within scope of the recirculation. No comment will be considered as a valid element of a Disapprove vote unless the voter enters it into the myBallot database and designates it appropriately.

If you have voted Disapprove, I urge you to review the comment resolutions and let us know which, if any, of your comments have been satisfactorily resolved. If you choose to cast an Approve vote, we will assume that all of them are resolved to your satisfaction.

Sincerely,

Roger Marks
Chair, IEEE 802.16 Working Group on Broadband Wireless Access
