Re:	Call for Contributions on Project 802.16d: IEEE Standard 802.16: 2-11 GHz System Profiles and Corrections of Errors in Base Standard. 18 Dec. 2002. Errata in IEEE 802.16a or 802.16c, or those in 802.16 not corrected in 802.16a or 802.16c.	
Abstract	IEEE Std 802.16c-2002 added ATM Classifier service flow parameters but forgot to define a way to report back classifier errors in the DSx-RSP messages.	
Purpose	Provide text that should be included by the 802.16d amendment to 802.16.	
Notice	This document has been prepared to assist IEEE 802.16. It is offered as a basis for discussion and is not binding on the contributing individual(s) or organization(s). The material in this document is subject to change in form and content after further study. The contributor(s) reserve(s) the right to add, amend or withdraw material contained herein.	
Release	The contributor grants a free, irrevocable license to the IEEE to incorporate material contained in this contribution, and any modifications thereof, in the creation of an IEEE Standards publication; to copyright in the IEEE's name any IEEE Standards publication even though it may include portions of this contribution; and at the IEEE's sole discretion to permit others to reproduce in whole or in part the resulting IEEE Standards publication. The contributor also acknowledges and accepts that this contribution may be made public by IEEE 802.16.	
Patent Policy and Procedures	The contributor is familiar with the IEEE 802.16 Patent Policy and Procedures < http://ieee802.org/16/ipr/patents/policy.html >, including the statement "IEEE standards may include the known use of patent(s), including patent applications, provided the IEEE receives assurance from the patent holder or applicant with respect to patents essential for compliance with both mandatory and optional portions of the standard." Early disclosure to the Working Group of patent information that might be relevant to the standard is essential to reduce the possibility for delays in the development process and increase the likelihood that the draft publication will be approved for publication. Please notify the Chair < mailto:chair@wirelessman.org > as early as possible, in written or electronic form, if patented technology (or technology under patent application) might be incorporated into a draft standard being developed within the IEEE 802.16 Working Group. The Chair will disclose this notification via the IEEE 802.16 web site < http://ieee802.org/16/ipr/patents/notices >.	

Errata – Missing ATM Classifier Error Parameter Set

Ken Stanwood

Ensemble Communications

Introduction

IEEE Std 802.16c-2002 added ATM Classifier service flow parameters but forgot to define a way to report back classifier errors in the DSx-RSP messages. The mechanism should work identically to the way it is defined in section 11.4.9.3.3 of IEEE Std 802.16c-2002 for packet service classifiers.

Instructions

The place to put this edit does not exist in IEEE Std 802.16-2001, but only in the standard as amended by IEEE Std 802.16c-2002. Assuming the edits specified by IEEE Std 802.16c-2002, add a section:

11.4.9.4.4 ATM Classifier Error Parameter Set

This encoding shall be identical to the encoding for the Classifier Error Parameter Set for packet services specified in section 11.4.9.3.3.
