Comment Type: TR

Discussion:
- Partially accept William Lo's commentary #66. Suggest additional improvement. Need to identify the OAM symbol based on the OAM framing bit.

Suggested Remedy:
- At line 26, change "Parity_Check(rx_oam_field<8:0>) = Even" to "(rx_cnt !=16) * (rx_oam_field<8> = 0)".
- At line 31, change "else" to "(rx_cnt !=16) * (rx_oam_field<8> = 1)"

Proposed Response: Response Status: O
