

Power Engineering Society Transmission and Distribution Harmonics Working Group P519A Task Force

Chair
Tom Gentile
EUA Service Corp.
Post Office Box 543
West Bridgewater, MA
02379

Vice Chair
Bill Moncrief
EPRI
3025 Windward Plaza
Suite #300
Alpharetta, GA 30005

**P519A Task Force
Co-Chairs**
Mark McGranaghan
Knoxville, TN
Bill Moncrief
Alpharetta, GA

**Harmonic Modeling and
Simulation Task Force
Chair**
Wilsun Xu
New Address

**Interharmonics
Task Force
Chair**
Erich Gunther
Knoxville, TN

**Harmonic Modeling and
Simulation Task Force
Chair**
Wilsun Xu

January, 1999

Minutes of Meeting, 1998 IEEE PES Summer Meeting San Diego, California

Mark McGranaghan called the meeting to order at 2:00. He announced that Draft 6 would migrate to the official IEEE Standards website. The members and guests introduced themselves. We welcomed guests from the NEMA Lighting group and IBM.

Mark McGranaghan noted that the next revision of Standard 519 may include interharmonics and recommended limits on interharmonics. The group would look to the Interharmonics Working Group for guidance on those topics.

The revision to the 519 PAR has been approved, making it a joint IAS and PES effort. Tom Gentile observed that this is the logical group to do that work, and that the effort really needs the participation of the members of this task force.

Mark Halpin will conduct the meeting in New York, and will share the TF P519A time slot. Tom Gentile asked interested parties to contact Mark Halpin with concerns about the existing Std 519 (Halpin@ece.msstate.edu).

Warren Anderson offered to be the liaison between this group and the NEMA Lighting Committee.

Girts Zeidenbergs of IBM suggested that Draft 6 of P519A be offered to the PES Power Systems Communications Committee for comment. Within IBM, he thought there were five groups that would be interested.

The tutorial committee reported that the work is progressing nicely from the document. Target date for presentation is Summer '99 and Winter 2K. It was noted that the winter meeting for 2000 is scheduled for Singapore.

Paulo Ribero asked if P519A refers to the upcoming revision of Std 519. M. McGranaghan replied no, that the case studies in P519A are based on Std 519-1992, but that little change was expected in the applications.

For web-based updates, members are directed to the IEEE website –

[HTTP://Grouper/IEEE.Org/Groups/Harmonic/](http://Grouper/IEEE.Org/Groups/Harmonic/)

The Task force should be listed there.

There being no further business, the meeting was adjourned. (Mark Halpin led a discussion on the revision of Std. 519.)

Minutes of P519A,
Summer 1998
