36-bit Organizationally Unique Identifier (OUI-36)

To request a 36-bit Organizationally Unique Identifier (OUI-36), please submit [request form 2](#). The OUI-36 can be assigned in conjunction with a number of standards. It does not limit your right to use your assignment for both purposes. If there are no problems with the information on the application or the payment, the application will be processed within 10 working days.

As of 5 December 2003, companies requesting confidentiality for OUI-36 assignments will be required to pay a fee for privacy. Assignees will also be required to pay an annual fee to maintain confidentiality.

The 36-bit Organizationally Unique Identifier (OUI-36) assignment fee is \$550.00 (US) plus \$1,000.00 (US) to maintain confidentiality as a private assignment, and \$1,000.00 (US) annual fee for renewal of a private assignment.

Confidentiality Fee Pricing List			
Products	Services	Fees	Total Due
36-bit Organizationally Unique Identifier (OUI-36)	Public Registry (company name and address on the public listing)	\$550.00(US)	\$550.00(US)
36-bit Organizationally Unique Identifier (OUI-36)	Private Registry (company name and address not on the public listing)	\$550.00(US) Plus \$1,000.00(US)	\$1,550.00(US)
OUI-36 Annual Confidentiality Fee (Yearly)	Renewal* (for private registry only)	\$1,000.00	\$1,000.00

* Payment options for the renewal fee are credit card, check or [wire transfer](#).

This single assignment applies to all of the following:

- CDI-40: Context Dependent Identifier, 40-bits.
- EUI-48: Extended Unique Identifier, 48-bits.

EUI-64: Extended Unique Identifier, 64-bits.

The IEEE Registration Authority will assign an additional 36-bit Organizationally Unique Identifier (OUI-36) to an organization requesting one, providing they submit a letter on company letterhead to the IEEE Standards Department stating that their company will not "ship" product in the new block assignment until well after they have reached (shipped) at least 95% of the block assignment, in the context of a specified standard. Your company should ensure large numbers of derived identifiers are not left unused.

The IEEE does not accept requests for applicant-specified assignments. Please call the IEEE at the phone number you have questions concerning the completion of this form.
