Contact information for Standards Representative:

4.1 Type of Ballot: Individual

Page 4

4.2 Expected Date of Submission for Initial Sponsor Ballot: 2008-04

4.3 Projected Completion Date for Submittal to RevCom: 2008-12

5.1 Approximate number of people expected to work on this project: 15

Page 5

5.2 Scope of Proposed Standard: The scope of the Standard Software Interface for Maintenance Information Collection and Analysis (SIMICA) is an implementation independent specification for a software interface to information

Old Scope: The scope of the Standard Software Interface for Maintenance Information Collection and Analysis (SIMICA) is an implementation independent specification for a software interface to information systems

systems containing data pertinent to the diagnosis and maintenance of complex systems consisting of hardware, software, or any combination thereof. These interfaces will support service definitions for creating application programming interfaces (API) for the access, exchange, and analysis of historical diagnostic and maintenance information. The standard will use the information models of IEEE Std 1232/D4.0 - Artificial Intelligence Exchange and Service Tie to All Test Environments (AI-ESTATE) as a foundation.

containing data pertinent to the diagnosis and maintenance of complex systems consisting of hardware, software, or any combination thereof. These interfaces will support service definitions for creating application programming interfaces (API) for the access, exchange, and analysis of historical diagnostic and maintenance information. The standard will use the information models of IEEE Std 1232-2002 - Artificial Intelligence Exchange and Service Tie to All Test Environments (AI-ESTATE) as a foundation.

5.3 Is the completion of this standard is dependent upon the completion of another standard: No

If yes, please explain:

5.4 Purpose of Proposed Standard: The purpose of the IEEE P1636 Standard Software Interface for Maintenance Information Collection and Analysis (SIMICA) is to specify a software interface for access, exchange, and analysis of product diagnostic and maintenance information. This will address the pervasive need of organizations to assess the effectiveness of diagnostics for complex systems throughout the product lifecycle. The use of formal information models will facilitate exchanging historical maintenance information between information systems and analysis tools. The models will facilitate creating open system software architectures for maturing system diagnostics.

5.5 Need for the Project:

5.6 Stakeholders for the Standard:

Intellectual Property

6.1.a. Has the IEEE-SA policy on intellectual property been presented to those responsible for preparing/submitting this PAR prior to the PAR submittal to the IEEE-SA Standards Board? Yes

If yes, state date: 2008-09-05

If no, please explain:

6.1.b. Is the Sponsor aware of any copyright permissions needed for this project? No

If yes, please explain:

6.1.c. Is the Sponsor aware of possible registration activity related to this project? No

If yes, please explain:

7.1 Are there other standards or projects with a similar scope? No

Explanation:

Sponsor Organization:

Project/Standard Number:

Project/Standard Date: 0000-00-00

Project/Standard Title:

7.2 International Standards Activities

a. Adoptions

Is there potential for this standard to be adopted by another organization? Do not know at this time

8.1 Additional Explanatory Notes: (Item Number and Explanation)

The original PAR references IEEE Std 1232-2002. This standard is presently in revision. This Standard now needs to reference Draft 4 of 1232. This Standard has been to ballot and has been submitted to RevCom. This PAR change to reference Draft 4 of 1232 in the Scope is to align verbatim with the balloted 1636.

Subject: Electronic Meeting

From: "Wilmering, Timothy J" <timothy.j.wilmering@BOEING.COM>

Date: Fri, 12 Dec 2008 11:09:24 -0600

To: stds-dmc-member@IEEE.ORG

All -

This message convenes an electronic meeting of IEEE SCC20 Diagnostic and Maintenance Control subcommittee. We announced the meeting just over 72 hours ago, those who have agreed to participate are:

Tim Wilmering
Bill Gerstein
Joe Stanco
John Sheppard
Tony Alwardt
Alicia Helton
Michelle Harris
Daryl Busch
John Ralph
Ion Neag
Mukund Modi
Mike Stora

The purpose of the meeting is to resolve an issue raised by REVCOM when discussing approval of P1636. 1636 failed to pass RevCom because the scope and purpose did not match the PAR. 1636 referred to 1232 D4 instead of 1232-2002. So, in order to get another vote by RevCom we have to change the PAR to reflect the same reference as in P1636, which is reflected in the attached modified PAR.

. <<Draft PAR Confirmation Number 256166743.doc>>

There is an alternative - that is to change the reference in the P1636 document, and then recirculate again.

The recommendation of the co-chairs and secretary is to modify the PAR. Mike Seavey is working diligently behind the scenes to see that the PAR change can be approved and the standard approval revisited at the March 2009 meeting.

SO - if it should be the will of the committee members, is there a motion to amend the PAR as reflected in the attached document?

Regards,

Tim

Mark Kaufman has submitted a motion to accept the proposed changes to the PAR per the previously circulated draft. Bill Gerstein has seconded that motion.

Is there any discussion?

In an electronic meeting, if you are listed as a participant and have nothing to discuss, you must respond to this effect so that we will know when we can proceed with the vote.

If of course, you do have an issue to discuss with the motion, now is the time for you to share your thoughts with the participants.

Thanks,

Tim

stds-dmc-member@IEEE.ORG

Subject: RE: Electronic Meeting

Mark Kaufman has submitted a motion to accept the proposed changes to the PAR per the previously circulated draft. Bill Gerstein has seconded that motion.

Is there any discussion?

In an electronic meeting, if you are listed as a participant and have nothing to discuss, you must respond to this effect so that we will know when we can proceed with the vote.

If of course, you do have an issue to discuss with the motion, now is the time for you to share your thoughts with the participants.

Thanks,

Tim

With all due respect, the motion is not clear as to its intent. So, can the motion be modified to be more specific? The initial recommendation of the co-chairs was to amend the PAR as reflected in the attached document attached in the call to order message.

The new motion will require a second, of course.

Tim,

Question: Are there any negative ramifications to the Par stating that the standard will use the information model of 1232/D4.0 as a foundation? Is it ok that there might be a D5.0 soon and then a -2009?

Darryl -

The P1636 that was balloted WAS based on the models of 1232 D4. So, whether or not there is a D5, we will not change this version of SIMICA to reflect any models other than D4.

So, any changes that occur to the models between now and when we go to ballot with 1232 in January should be examined for their impact to P1636 - fortunately, the dependencies are few, sand I think in well-established areas of the model.

Let me take a shot at that.

There are technical ramifications; however, since the PAR says the draft will be used as a "starting point," I do not see them as significant. The bigger problem is that, if we do not make this specific change, we will be required to do another recirculation ballot on the standard.

Here are our options:

1. Modify the PAR in this specific way. This route only requires NESCOM approval. REVCOM would not need to see the standard again.
2. Modify the PAR to be the most "correct." This route requires NESCOM approval, and addition recirculation of the document, and subsequent REVCOM approval. This is probably the most painful.
3. Keep the PAR as is and change the standard. This route requires recirculation of the document and subsequent REVCOM approval. In reality, while it is harder than #1, it really isn't that much harder. But the change to the standard is to reference the 2002 draft. I don't think we really want to do that.

The skids have been greased both with NESCOM and REVCOM such that option 1 (the one that is the focus of the motion) is the simplest change to get the standard approved.

Subject: RE: Electronic Meeting

With all due respect, the motion is not clear as to its intent. So, can the motion be modified to be more specific? The initial recommendation of the co-chairs was to amend the PAR as reflected in the attached document attached in the call to order message. The new motion will require a second, of course.

Subject: Re: Electronic Meeting

Let me take a shot at that.

There are technical ramifications; however, since the PAR says the draft
will be used as a "starting point," I do not see them as significant.
The bigger problem is that, if we do not make this specific change, we
will be required to do another recirculation ballot on the standard.

Here are our options:

1. Modify the PAR in this specific way. This route only requires NESCOM approval. REVCOM would not need to see the standard again.
2. Modify the PAR to be the most "correct." This route requires NESCOM approval, and addition recirculation of the document, and subsequent REVCOM approval. This is probably the most painful.
3. Keep the PAR as is and change the standard. This route requires recirculation of the document and subsequent REVCOM approval. In reality, while it is harder than #1, it really isn't that much harder. But I think the change to the standard is to reference the 2002 draft. I don't

think we really want to do that.

The skids have been greased both with NESCOM and REVCOM such that option

1 (the one that is the focus of the motion) is the simplest change to get the standard approved.

Let me take a shot at that.

There are technical ramifications; however, since the PAR says the draft will be used as a "starting point," I do not see them as significant.

The bigger problem is that, if we do not make this specific change, we will be required to do another recirculation ballot on the standard.

Here are our options:

1. Modify the PAR in this specific way. This route only requires NESCOM approval. REVCOM would not need to see the standard again.

2. Modify the PAR to be the most "correct." This route requires NESCOM approval, and addition recirculation of the document, and subsequent REVCOM approval. This is probably the most painful.

3. Keep the PAR as is and change the standard. This route requires recirculation of the document and subsequent REVCOM approval. In reality, while it is harder than #1, it really isn't that much harder.

But I the change to the standard is to reference the 2002 draft. I don't

think we really want to do that.

The skids have been greased both with NESCOM and REVCOM such that option 1 (the one that is the focus of the motion) is the simplest change to get the standard approved.

Subject: Re: Electronic Meeting

Let me take a shot at that.

There are technical ramifications; however, since the PAR says the draft will be used as a "starting point," I do not see them as significant.

The bigger problem is that, if we do not make this specific change, we will be required to do another recirculation ballot on the standard.

Here are our options:

1. Modify the PAR in this specific way. This route only requires NESCOM approval. REVCOM would not need to see the standard again.

2. Modify the PAR to be the most "correct." This route requires NESCOM approval, and addition recirculation of the document, and subsequent REVCOM approval. This is probably the most painful.

3. Keep the PAR as is and change the standard. This route requires recirculation of the document and subsequent REVCOM approval. In reality, while it is harder than #1, it really isn't that much harder.

But I the change to the standard is to reference the 2002 draft. I don't

think we really want to do that.

The skids have been greased both with NESCOM and REVCOM such that option 1 (the one that is the focus of the motion) is the simplest change to get the standard approved.

Mark Kaufman has submitted a motion to accept the proposed changes to the PAR per the previously circulated draft. Bill Gerstein has seconded that motion.

Is there any discussion?

In an electronic meeting, if you are listed as a participant and have nothing to discuss, you must respond to this effect so that we will know when we can proceed with the vote.

If of course, you do have an issue to discuss with the motion, now is the time for you to share your thoughts with the participants.

Thanks,

Subject: Re: Electronic Meeting

Let me take a shot at that.

There are technical ramifications; however, since the PAR says the draft
will be used as a "starting point," I do not see them as significant.

The bigger problem is that, if we do not make this specific change, we
will be required to do another recirculation ballot on the standard.

Here are our options:

1. Modify the PAR in this specific way. This route only requires NESCOM
approval. REVCOM would not need to see the standard again.
2. Modify the PAR to be the most "correct." This route requires NESCOM
approval, and addition recirculation of the document, and subsequent
REVCOM approval. This is probably the most painful.
3. Keep the PAR as is and change the standard. This route requires
recirculation of the document and subsequent REVCOM approval. In
reality, while it is harder than #1, it really isn't that much harder.
But I the change to the standard is to reference the 2002 draft. I don't
think we really want to do that.

The skids have been greased both with NESCOM and REVCOM such that option
1 (the one that is the focus of the motion) is the simplest change to
get the standard approved.

Subject: Re: Electronic Meeting

Let me take a shot at that.

There are technical ramifications; however, since the PAR says the draft will be used as a "starting point," I do not see them as significant.

The bigger problem is that, if we do not make this specific change, we will be required to do another recirculation ballot on the standard.

Here are our options:

1. Modify the PAR in this specific way. This route only requires NESCOM approval. REVCOM would not need to see the standard again.

2. Modify the PAR to be the most "correct." This route requires NESCOM approval, and addition recirculation of the document, and subsequent REVCOM approval. This is probably the most painful.

3. Keep the PAR as is and change the standard. This route requires recirculation of the document and subsequent REVCOM approval. In reality, while it is harder than #1, it really isn't that much harder. But I the change to the standard is to reference the 2002 draft. I don't think we really want to do that.

The skids have been greased both with NESCOM and REVCOM such that option 1 (the one that is the focus of the motion) is the simplest change to get the standard approved.

Subject: Re: Electronic Meeting

Let me take a shot at that.

There are technical ramifications; however, since the PAR says the draft will be used as a "starting point," I do not see them as significant.

The bigger problem is that, if we do not make this specific change, we will be required to do another recirculation ballot on the standard.

Here are our options:

1. Modify the PAR in this specific way. This route only requires NESCOM approval. REVCOM would not need to see the standard again.

2. Modify the PAR to be the most "correct." This route requires NESCOM approval, and addition recirculation of the document, and subsequent REVCOM approval. This is probably the most painful.

3. Keep the PAR as is and change the standard. This route requires recirculation of the document and subsequent REVCOM approval. In reality, while it is harder than #1, it really isn't that much harder. But I the change to the standard is to reference the 2002 draft. I don't think we really want to do that.

The skids have been greased both with NESCOM and REVCOM such that option 1 (the one that is the focus of the motion) is the simplest change to get the standard approved.

Subject: Vote on Motion Before the Committee

From: "Wilmering, Timothy J" <timothy.j.wilmering@boeing.com>

Date: Mon, 15 Dec 2008 07:15:55 -0600

To: stds-dmc-member@IEEE.ORG

All -

Re the issue of amending the P1636 PAR to harmonize its wording with that of the P1636 document, we have a motion before the committee, made by Mark Kaufman, and seconded by Bill Gerstein, to "accept the proposed changes to the PAR per the previously circulated draft ." I then asked the committee if there was any discussion on the matter @ 11:57 AM Friday. Having now heard from all but two declared participants that there is no further discussion on the motion before the committee, I am prepared to call the question.

Please respond "yea," "nay," or "abstain" to assert your vote on this motion.

Regards,

Tim

Re the issue of amending the P1636 PAR to harmonize its wording with that of the P1636 document, we have a motion before the committee, made by Mark Kaufman, and seconded by Bill Gerstein, to "accept the proposed changes to the PAR per the previously circulated draft ." I then asked the committee if there was any discussion on the matter @ 11:57 AM Friday. Having now heard from all but two declared participants that there is no further discussion on the motion before the committee, I am prepared to call the question.

Please respond "yea," "nay," or "abstain" to assert your vote on this motion.

Regards,

Tim

Well, the votes came in quickly this morning!

We had 17 participants (not counting me) to vote on the motion, we already have 12 affirmatives, and no negative votes, so the motion carries. For the record:

		Discussion	Yes
Tim Wilmering	no	N/A	
Bill Gerstein	no	X	
Joe Stanco		no	X
John Sheppard	no	X	
Tony Alwardt	no	X	
Alicia Helton	no	X	
Michelle Harris	no	X	
Darryl Busch	no	X	
John Ralph		no	
Ion Neag	no		X
Mukund Modi	no		X
Mike Stora		no	
Pat Kalgren		no	X
Mark Kaufman	no		
David Rohacek			
Mike Seavey		no	X
Melissa Ford			
Carry Spier	no		X

Thanks all for your quick attention this morning. We will continue with the process of Steering and IEEE approval, and the subsequent anticipated happy result for P1636...

Happy Holidays, see you in Orlando!

Tim
