

Minutes  
Series Capacitor Working Group  
IEEE SPM Chicago – Substation Committee – Capacitor Subcommittee  
July 23, 2002

Combined paper presentation and working group session

1. Paper Presentation – “*Thyristor Protected Series Capacitor Project at Southern California Edison Co.*” by Bharat Bhargava and Dick Haas, waveform of the June 18 incident at Vincent Substation were provided by Peter Lipps and a discussion of capacitor issues by Karl Fender. 30 attendees were present at the presentation.
2. Status of the 824 Series Capacitor Standard:
  - a. Balloting results: 83% returned and 100% affirmative
  - b. Ballot comments received: 118
  - c. All comments were reviewed at the meeting and all but 9 have been addressed.
  - d. The revised Standard will be resubmitted for balloting as soon as the 9 remaining comments are addressed.
3. Draft Specification Guide was provided to the members present and previously e-mailed to all the members of the SubComm. Past assignments will be reviewed and new assignments made prior to the next WG meeting. The chair will submit a SPAR to continue this effort.
4. Power Systems Relaying Committee K13 Draft Outline and “Guide for the Protection of Transmission Line Series Capacitors” was provided to the members present and previously e-mail to all members of the SubComm. Comments on this document will be provided to the K13 Chair prior to their Sept. Meeting.

Respectively Submitted,  
Gerald Lee, WG Chair
