

**IEEE PES Transmission & Distribution Committee
Integration of Renewable Energy Into the Transmission & Distribution
Grids Subcommittee
Joint Technical Committee Meeting 2007
January 8, 2007
Wyndham Resort, Orlando, FL**

Introductions were made.

Santish Ranade: Chairman
Gene Wolf: Secretary
Joe Miller: JAM Enterprise – member
Steve Tsai: National Chung Cheng - member
Hugh Nguyen: Puget Sound Energy - member
Kwang Lee: Penn State University - member

History – Satish gave a history of the subcommittee and began a discussion of the subcommittee's role.

Review of charter – the subcommittee has the ability to produce tutorials, working groups, papers, standards, etc. The members will begin to develop plans for working groups and task forces. The goal will be to have several projects defined prior to the Tampa meeting.

The group can also produce tutorials on various renewables subject. Joe Miller has feels the Modern Grid Initiative can help in developing these tutorials. Satish will place scope on web page and has suggested each attendee send the minute off to others that are interested in the subcommittee's area of operation.

Current Activities – we need some deliverables to get the attention of the renewable community. The subcommittee is sponsoring a panel session called "Harding Power Systems Through Renewables and Microgrids" at the General Meeting to be held in Tampa next June. In addition, we will cosponsor a panel with the PQ subcommittee also to be held at the General Meeting. This panel session is called "PQ Impact of Windfarms".

Future Activities – Tampa will be the first big meeting for the subcommittee. At that meeting we can select deliverables. We need ideas to define working groups. We can act as a liaison between other subcommittees.

Other Items – groups like AWIA & UWIG will be invited to take part in the subcommittee meeting in Tampa.

Action items – send out minutes to all interested parties. Talk to any group meeting you attend and let them know this subcommittee exists.

Next meeting: 2—7 IEEE PES General meeting to be held in Tampa at the Marriott Waterside Hotel and the Tampa Convention Center, Tampa, FL
