

## Technical Tour and Welcome Reception / Sunday Program

Tours of MR Factories and/or Historic Regensburg

Welcome Reception at Fuerstliches Brauhaus, Regensburg

Date: Sunday, March 17

Pick-up from the DOLCE Hotel

Time: 10:00 am – 8:30 pm

As far as high-voltage technology is concerned, Regensburg is a global metropolis: it is here that our holding company, Maschinenfabrik Reinhausen, has its Center of Competence. This high-tech laboratory has yet to find its equal anywhere in the world. This is where we submit on-load tap-changers to the most stringent tests in high-voltage, power and mechanical laboratories. A whole spectrum of tests can be comprehensively subjected to these devices, thus simulating loads during their service life. It does not matter whether electrical, mechanical, chemical or climatic operational conditions are concerned – we have all the necessary testing equipment and procedures at our disposal in our research center.

At the **Headquarters in Werk I (Factory I) in Regensburg** we manufacture: On-load (OLTC) & Off-circuit tap-changers, Voltage Regulators, Monitoring Systems and Drives and testing our tap-changers in our test center.

In our **Werk II (Factory II) in Haslbach** we produce hollow core composite insulators and train our staff in our training center.

*Jeans and sneakers/tennis shoes will be commonplace!*
