

Power Transformer Subcommittee Task force / Working Group Report

Document #: WG TC Application Guide IEC 60214-2

Document Title: Tap-Changers

Chair: Craig A. Colopy Vice-Chair Axel Kraemer

Secretary Adam M. Sewell

Current Draft Being Worked On: NA Dated: NA

Meeting Date: 25 October 2016 Time: 15:15 to 16:30

Attendance:	Members	<u>18</u>
	Guests	<u>39</u>
	Guests Requesting Membership	<u>0</u>
	Total	<u>57</u>

Meeting Minutes / Significant Issues / Comments:

1. Meeting was called to order at 3:15 pm, October 25, 2016.
2. Chairman provided the WG a background relating to the work being done to adopt the IEC standard 60214-1 as a dual logo document preserving main technical differences between C57.131 and 60214-1 in an Annex. Annex E of C57.131 is included within the latest draft of 60214-2, Tap Changer Application Guide.
3. The latest document draft 6WD of 60214-2 was presented to the WG by Axel Kramer. The draft showed highlighted text which was reviewed at the last meeting in Dresden, Germany and showed red text for any changes to the draft done in Dresden, Germany. Some comments were made by the WG:
 - a. Page 8-Introduction – add ‘tap-changer’ in front of manufacturer – Axel Kraemer
 - b. Section 11 – Storage – Axel Kraemer to work on changing title
 - c. Paul Jarman requested to see information on manual operation of OLTC’s. Section 13.2.1 of the draft was displayed showing information about manual operation of OLTC’s.
 - d. Paul Jarman made a comment that OLTC instead of LTC should be adopted. The chairman commented use of OLTC has been preferred for implementation in majority of joint IEC/IEEE documents where applicable.
4. IEC CD and IEEE Ballot are planned in Q3, 2017, with a CDV to follow likely before the end of 2017.
5. Future Work Sessions:
 - a. Vancouver, BC Canada, Oct. 27, 2016, 1-5PM, IEEE Transformer Committee meeting
 - b. 1st Quarter 2017, – TBD
6. Meeting closed at 4:30 pm.
