

IEEE BTS G-2.1 Audio Video Techniques Committee  
Subcommittee G-2.1.6 Video Compression

---

**To:** IEEE Subcommittee G-2.1.6

**Date:** June 3, 1998

**From:** David Fibush

**Copy to:** John Reiser - FCC

**Subject:** ITU-R JWP 10-11Q on Audio and Video Quality Assessment

The ITU Radiocommunication Bureau has established a new Joint Working Party on audio and video quality assessment. Included in the work of JWP 10-11Q will be questions previously assigned to Study Group 11 WP11E and some of the questions previously assigned to Study Group 10 WP10C. These questions are listed below with the full text in Circular Letter 11/LCCE/29 that I can provide by email.

64-4/11 – Objective Picture Quality Parameters and Associated Measurement and Monitoring Methods for Television Images

211-2/11 – Subjective Assessments of the Quality of Television Pictures Including Alphanumeric and Graphic Pictures

234/11 – Subjective Assessment of Stereoscopic Television Pictures

85-2/10 – Subjective Assessment of Sound Quality in Broadcasting Using Digital Techniques

106-1/10 – Subjective Assessment of Sound Quality

220/10 – Subjective Assessment of Small, Medium and Large Impairments in Sound Quality

The first meeting of JWP 10-11Q will take place in Geneva, October 19 – 21, 1998. In preparation for that meeting I have been asked to coordinate a call for U.S. contributions. If necessary there will be a U.S. coordination meeting although it is expected all discussion can be by correspondence. All U.S. contributions must be approved by the U.S. National Committee prior to submission to the ITU. This usually takes about four weeks and is handled by mail. Contributions must be at the ITU at least one week before the meeting.

Persons interested in providing contributions to the JWP 10-11Q meeting or being a member of the group coordinating the contributions may contact me at the following coordinates:
