

1450.4 meeting minutes – 06/18/09

Attendees: Jim O'Reilly, Bruce Parnas, Ajay Khoche

Not present: Ernie Wahl, Markus Seuring

Agenda:

- IEEE Meeting Preamble (No discussion of proprietary information)
- Meeting minutes from most recent meeting (06/11/09) are now posted on the web.
- Review and finalize updated binning syntax. Work-in-progress revisions to syntax document are posted on the web.
 - Continued discussion of binning issues and work to reconcile syntax document and Ernie's binning document.
 - Issues resolved (for further details, see revision comments in syntax document dated 6/16/09 and 6/23/09):
 - Separated Bindefs into SoftBinDefs and HardBinDefs. Both constructs are now identical, except that HardBinDefs are limited to one axis only (named or unnamed). Expected usage of HardBinDefs is to have unnamed axis, allowing simpler access syntax (axis does not have to be specified, only the group and bin).
 - Update bin access syntax to include BIN_NAME or BIN_NUMBER, as well as the full hierarchical syntax.
 - Added ClearBin action (in addition to SetBin and SetBinStop). Keyword All is allowed in addition to single bin specifier.
- Actions:
 - Jim:
 - Update syntax document based on latest discussions and agreements.
 - Ernie:
 - Review Jim's updated syntax doc for consistency. Does it accurately represent what we agreed to? Update binning conceptual document to reflect decisions made regarding binmap syntax (ongoing per discussions).
- Next Meeting 06/25/09.

For reference STIL .4 information can be found at the IEEE STIL website:
