1450.4 meeting minutes – 07/16/09

Attendees: Jim O'Reilly, Bruce Parnas, Ernie Wahl

Not present: Markus Seuring, Ajay Khoche

Agenda:
- IEEE Meeting Preamble (No discussion of proprietary information)
- For this week, we'll continue walking through the binning conceptual document and review the recent changes to it and to the binning syntax (new syntax document, dated 07/08/09, is posted on the website). See change comments for 6/23, 7/8, and 7/15 for detailed list of changes. Let's review all these, and make sure I've correctly captured the changes discussed.
- Areas discussed, updates needed to documents.
    - Retest – will move to phase 2, or simplify.
    - Counter reset events – change from counter.On [Load | . . .] to counter.<Load | . . .>
    - Bin properties (p13, fig. 6)
    - Update spec/category/variables access notation (lines 506-531)
    - Need string to numeric conversion? Converting bin name of form "3.00 GHz" to a number that can be used in a timing expression.
    - Define Stop semantics in face of ContinueOnFail
        If FailBin != NoBin
        { SetBin This.FailBin; If ContinueOnFail == False
        Stop; }
    -

- Next Meeting 07/23/09.
