

1450.4 meeting minutes – 10/19/11

Attendees: Ernie Wahl, Markus Seuring, Jim O'Reilly

Not present: Ajay Khoche, Oleg Erlich, Paul Reuter

Agenda:

- IEEE Meeting Preamble (No discussion of proprietary information).
- Continue with discussion of section 7.6, Variables and Expressions.

Summary:

- ISSUE: reconcile STIL.1 and STIL.4 usage of the global (unnamed) Variable block with regard to the scope of visibility of Integer variables.
 - Discussed proposal put forth last week about a possible solution (adding additional attributes, with appropriate semantics) for integrating integer variables contained in unnamed (global) variables blocks between dot1 and dot4.
 - Markus felt it was too complex; as a result, we agreed to take another look at the issue, and possibly get around the difficulties by simply accepting, as a consequence of specifying dot4 code (Flow 2011) in the STIL statement, any dot1 constructs deemed to be useful in dot4.
 - Jim to review the full set of dot1 constructs and make recommendation as to which of them to accept as a standard part of dot4 - WITHOUT having to specify (Design 2005) in the Stil statement. This will be available by next week's meeting.

Actions:

- Jim to rework Verigy example from STIL paper so that the STIL translation is consistent with its original Verigy code.

Reference documents (If logged into your google account, can edit. If not, can only view.)

- [Current Draft Syntax Document](#)
- [Issues List](#)
- [Namespace resolution examples document](#)
- [Communications spread sheet](#) (scratchpad spreadsheet)
- [Communications word doc](#) (scratchpad word document)

Next meeting: 10/26/11
