Agenda:

 - EntryPoints as a separate block, referenced in TestProgram.
 - Agreed. Document had already been updated to reflect this; simply needed majority consent
 - DCSequence statements in test program
 - PowerRaise/PowerLower DCSequences.
 - Discussion about specific wording of conditions that cause these DCSequences to be applied. Settled on wording. Draft ballot document to be updated accordingly.
 - Deferred discussion of whether it might be appropriate to group the TestProgram block DCSequences (the 4 predefined names) – and perhaps other information - in a separate block (say, a block called TestEnvironment), and reference that block in the TestProgram. We'll continue this discussion next meeting.
- Open issues - are there other open issues that should be considered? A review of the open issues list can guide us here.
