

## **P1450.4 meeting minutes - 02/16/05**

Attendees: Jim O'Reilly, Jose Santiago, Dave Dowding, Tony Taylor, Don Organ

Not present: Tom Micek, Chris Nelson, Doug Sprague, Yuhai Ma, Jim Mosley, Eric Nguyen, Ernie Wahl, Dan Fan, Bob Roberts, Oscar Rodriguez

### **Summary:**

- Tony to send out correct draft of D11 (dated 09/22/04). The copy I sent out last week (dated 09/15/04) was incomplete.
- Tony also agreed to work with Don Organ to get an archive of the documents from the Inovy-hosted web site that Don had been maintaining, and which is currently offline. Tony will work on moving these documents (a history of WG meetings, minutes, documents, etc.) to the IEEE-hosted STIL web site.
- D11 vs. D13 test object issue. Tony is comfortable with the D13 representation. See minutes of the 02/09/05 WG meeting for details, in my email dated "Wed 2/9/2005 5:02 PM (PST)" (SUBJECT: P1450.4 meeting minutes from 02/09/05).
- Pre/post actions. Revisit D13d vs. d13e notions of this. See Ernie's email dated "Thu 11/18/2004 6:26 AM (PST)" (SUBJECT: clear delineation of tasks) and Jim's email dated "Thu 11/18/2004 4:33 PM (PST)" (subject: P1450.4 meeting minutes from 11/17/04).
- We're still in discussions in STC – STC has agreed to fund an effort to compare the OpenStar and STIL object model to see if they can merged.
- Jim and Ernie are still working out the specifics of the syntax for defaults (TestNode, TestObject, TestMethod).
