

P1450.4 meeting minutes - 04/20/05

Attendees: Jim O'Reilly, Daniel Fan, Dave Dowding, Don Organ, Ernie Wahl, Tony Taylor, Jim Mosley

Not present: Tom Micek, Doug Sprague, Yuhai Ma, Eric Nguyen, Oscar Rodriguez, Jose Santiago, Bob Roberts, Chris Nelson

Summary:

- Reviewed Dave's use case, comparing it to Ernie's translation of the Inovys example.
- In the above review, it became glaringly obvious that we need to do a better job of clarifying how the syntax and the conceptual model mesh together. In particular, the hierarchy of elements (test program, test object, test node, testflow) needs to be clarified so that we all understand implicitly.
