The exit condition fromTX_TIMER_IDLE to TX_TIMER_EXPIRES shouldn't end with a logic
OR. That should have been deleted when txFTTR == 0 was removed.

SuggestedRemedy

Delete the "||" after "txTTR == 0".

Response   *Response Status* **C**

ACCEPT IN PRINCIPLE. This trailing "||" symbol should be removed; as the change is
entirely editorial and has no effect whatever on the logic of the table, this comment will be
passed to the staff editors with a request that they implement this change as part of the
final editing prior to publication.

Turner, Michelle

Comment Type   **TR**   *Comment Status* **A**

802.1D (clause 7.12.7) and 802.1Q (clause 8.13.9) are cited in an informative note. Since it
is specifically referencing a clause, a date should be added to the document. If 802.1D or
802.1Q are revised, there is no guarentee that these clauses will still discuss this particular
information.

SuggestedRemedy

Response   *Response Status* **C**

ACCEPT IN PRINCIPLE. The sense of the informative note would also be preserved if the
references to the specific subclauses (7.12.7 and 8.13.9) were removed, so the text simply
refers to 802.1D and 802.1Q. The commenter has agreed that it would be appropriate to
make this change as part of the final editing by the staff editor prior to publication; this
comment will therefore be passed to the staff editors with a request that this change be
made at that time.
