

IEEE802.1Qay

Project Status

PBB-TE Current Status

- Draft P802.1Qay/D4.6 has been released on Dec 11th.
- This is the first draft to enter a Working Group Ballot. The ballot closed on Jan 5th.

P802.1Qay/D4.6 major changes

- Introduction of the `enableConnectionIdentifier` parameter in order to control the customer-MACaddress to backbone-MAC-address associations which must be disabled at the root node of a point-to-multipoint TE service instance;
- MIB updates to align the MIBs to clause 12;
- A number of editorial updates.

WG Recirculation Ballot statistics

- 50 members have replied (82 counting the base WG ballot)
- 28 members have sent approve ballots (39 counting the base WG ballot)
- No disapprove ballot has been received on the Recirculation Ballot (4 Disapproves have turned to Approve – the initiator of the fifth disapprove has withdrawn his voting rights)

	1st TG		2nd TG		3rd TG		4th TG		1st WG		2nd WG		1st WG (R)	
Approve	0	0%	0	0%	12	43%	23	68%	26	68%	24	83%	39	97.5%
Disapprove	28	100%	28	100%	16	57%	11	32%	12	32%	5	17%	1	2.5%
Abstain	54	65%	42	60%	43	59%	44	56%	44	52%	48	62%	42	51%
Total	83		71		74		79		82		77		82	

Ballot statistics

- A total of 14 comments have been received
- All the comments were sent on approve comments
 - Five comments on MIBs
 - Rest mostly typos/editorials
