LOCAL ADDRESSING STUDY GROUP

Patricia Thaler

Study Group charter

- As the IEEE 802.1 Working Group is chartered to concern itself with and develop standards and recommended practices in the following areas: 802 LAN/MAN architecture, internetworking among 802 LANs, MANs and other wide area networks, 802 Security, 802 overall network management, and protocol layers above the MAC & LLC layers.

- IEEE 802.1 proposes forming an 802.1 a Local Address Study Group to
  - Develop a PAR and CSD for a recommendation on Local Address usage
  - Develop one or more PARs on protocols for local address acquisition

- The study group will meet at times for maximum participation by stakeholders – e.g. evenings
  - The January interim is a collocated interim
