IEEE P802.1CBcv - FRER YANG Data Model and Management Information Base Module
Editor's report: July 2019

Stephan Kehrer, Hirschmann Automation and Control GmbH

July 16, 2019

802.1CBcv – status

- First editor's draft D0.0 has been uploaded July 16, 2019

- Contents of D0.0 mainly boilerplate text

- Skeleton document showing the structure of clauses that will be in 802.1CBcv

- Please point out any problems/incosistencies that you notice with the document structure to the editor

802.1CBcv – way forward

- Intention is to put in the following as quickly as possible
    - UML model
    - MIB module
    - YANG module

- Ballot cycle before the November 2019 desirable but questionable

- Ballot cycle on D0.1 before and comment resolution during the November 2019 plenary seems realistic

Thank you

Thank you!
