

YANGsters Monthly Telephone Conference

Date/Time:

2019-03-26

10 a.m. – 11 a.m. (Eastern Time)

Participants:

- Scott Mansfield (Ericsson)
- Stephan Kehrer (Hirschmann)
- Johannes Specht (Uni Duisburg, General Motors)
- Karthik Chandra Bose Subas (Nokia)
- Marek Hajduczenia (Charter Communications)
- Mark Ellison (Independent)
- William Zhao (Siemens)
- Markus Seehofer (Hirschmann)

Topics:

- Agenda Bashing
- Issues around YANG development, YANG catalog, github and website
 - Overview over the Vancouver discussion on the topic
 - the situation with regard to IEEE process and the use of github currently seems to be difficult and unclear
- Presentation on IEEE YANG locations **[insert link here once it is moved to public]**
 - Overview of requirements to YANG from the different viewpoint of users, developers, standards reviewers and IEEE administration
 - Overview over current location and organization of YANG files
 - table on the website
 - IEEE owned file storage for the YANG files
 - YANG catalog
 - github
 - standards documents
 - Discussion on the usage of the revision date in the filename and YANG revision entry
 - Date should not be overloaded to package YANG files to a certain release of a standards project
 - For packaging there is a draft in IETF right now describing the concept and how it can be used (see <https://tools.ietf.org/html/draft-rwilton-netmod-yang-packages-00>)
 - There was a question on why branches are not used to develop YANG modules for different projects
 - This is an issue with the current usage of the IETF git repository by IEEE 802.1

- Question on what YANG version shall be used for YANG module development for IEEE 802.1 standards
 - It was pointed out that some time ago there was a decision to use YANG 1.1 and NMDA
