## **Editor's Report for Ballot Comment Resolution (v2)**

**Stephan Kehrer, Hirschmann Automation and Control GmbH**

**January 21, 2020**

# P802.1CBcv/D0.2 Summary

D0.2 was the first draft for Task Group ballot. Everything in the draft should be considered as a contribution to the Time-Sensitive Networking Task Group by the editor.

This document provides an overview over the ballot statistics and sorts comments into discussion topics for ease of comment resolution. The Editor has made a best effort to organize the comments by comment type (E, ER, T, TR, etc.). In case of errors, the comment resolution database is the definitive source.

In those places where comments are grouped together (i.e. enclosed in []), they have been put into the category that is the best fit for that group.

For comments marked **red** the editor would prefer a discussion at the interim meeting. For comments marked black the editor assumes that they can easily be resolved on a call.

# Ballot Statistics

Category	Total	%
Yes	5	15.63%
No	4	12.50%
Voting Yes or No	9	28.13%
Abs. Time	6	18.75%
