Proposed Architecture based on Slides from Interim Slides in Rennes

Discussion about MAP/MAD Interface for RAP

Requirements:

- Has to be aligned with 802.1Q
- RAP MAP extensions needs source port information
- RAP attributes are different to MRP attributes
 - Additional TLVs
 - class dependent TLVs

Main Changes in Draft Proposal d1-2

- LRP specific descriptions reduced to necessary minimum
- Started restructuring of document
 - Replacement of pseudo code by text (see TA handling) -> focus on required actions instead of detailed order of actions
 - Reduced data interfaces by functional descriptions
 - Focus on control flow
 - Data structures are no longer specified in detail, but remain implantation specific
- RAP MAD is divided into ingress and egress functionality
