Sequence Recovery Function Refinements and Parameter Configuration

Resolution of Comments on the modification of the
Project Authorization Request (PAR) and Criteria for Standards Development (CSD)

2025-11-12

802.3 comments on the PAR and their resolution

- Comment:
none

802.3 comments on the CSD and their resolution

- Comment:
Section 1.2.3:
It was unclear to us if there are no other standards related to the sequence recovery function of Frame Replication and Elimination for Reliability. Please clarify. Change to “the” before “expected operational...” and end with “ expected in this amendment”.
- Response:
The IEEE 802.1CB base standards specifies Frame Replication and Elimination for Reliability. The intention is to point out in section 1.2.3 of the CSD that there is no existing IEEE 802 standard or standard project that would specify either the operational improvements or the recommended settings of parameters.
The text has been changed to:
“For IEEE 802.1 CB Frame Replication and Elimination for Reliability, no existing IEEE 802 standard or standard project addresses the operational improvements and recommended settings of parameters, both of which are expected in this amendment.”

802.11 comments on the PAR and CSD and their resolution

 - No comments.
- CSD
 - Comment:
1.2.4 and 1.2.5 “The ~~informative annex~~amendment” This should be consistent. “informative annex” should be “amendment” consistently in the CSD.
 - Response:
The suggested change has been made.
