ITU-T Q14/15 consented nine documents at the ITU-T SG15 closing plenary on 24 October 2025. Consent means that the plenary reached consensus that the work on the following documents is technically stable and will be progressed to the next step of the alternative approval process before publication as a Technical Recommendation.

The following documents were consented (the 9 attachments):

- **TD106R1/P:** Revision to G.7710 “*Common equipment management function requirements*”.
- **TD114R1/P:** Revision to G.7716 “*Architecture of management and control operations*”.
- **TD178R1/P:** Amendment 1 to G.7719 “*Management information model for management-control components and functions*”.
- **TD107R1/P:** Amendment 1 to G.8052 “*Protocol-neutral management information model for the Ethernet transport capable network element*”.
- **TD111R1/P:** Amendment 1 to G.8152 “*Protocol-neutral management information model for MPLS-TP network elements*”.
- **TD118R1/P:** Amendment 2 to G.8350 “*Management and Control of metro transport networks*”.
- **TD115R1/P:** Revision to G.874 “*Management aspects of optical transport network elements*”.
- **TD116R1/P:** Amendment 1 to G.875 “*Optical transport network: Protocol-neutral management information model for the network element view*”.

TD112R2/P: Amendment 3 to G.876 “*Management Requirement and Information Model for the optical media network*”
