Dear Colleagues,

The IEEE 802.1 Working Group would like to thank the Japan Automotive Software Platform and Architecture (JASPAR) organization for the information provided in liaison statement <https://www.ieee802.org/1/files/public/docs2025/liaison-JASPAR-TimeSyncProfile-1125.pdf> about “Proposal of the Detail of Time Sync Automotive Profile”.

The IEEE 802.1 WG is interested in further developments of IEEE Std 802.1DG via amendments to address the needs of the automotive industry. We thank you for the details provided in your liaison statement on the time synchronization profile that could be added to IEEE Std 802.1DG via an amendment.

We would appreciate further communication between our organizations, e.g., on the scope of a potential IEEE 802.1DG amendment project.

Note that the IEEE 802 work is open and contribution driven. Participation is on an individual basis and technical discussion can be conducted based on individual contributions. The IEEE 802.1 TSN Task Group meets at Plenary and Interim sessions and holds electronic meetings in-between sessions as listed in the WG calendar: <https://1.ieee802.org/wg-calendar>.

Respectfully submitted,
Glenn Parsons
Chair, IEEE 802.1 Working Group
