| IEEE 802.1 REVISION REQUEST 0141                                   |
+--------------============================================----------+
```

DATE: July 17, 2014
NAME: John Messenger
COMPANY/AFFILIATION: ADVA Optical Networking Ltd
E-MAIL: JMessenger@advaoptical.com

REQUESTED REVISION:
      STANDARD: 802.1Q-2014
      CLAUSE NUMBER: 6.6.1, 6.7.1
      CLAUSE TITLE: ISS, and Support of ISS

RATIONALE FOR REVISION:

Maintenance item 0125 copied these functions from 802.1Q to 802.1AC, but left them in 802.1Q
so that Q-Rev could be completed independently of 802.1AC-Rev.  Once 802.1AC-Rev has been
published, this needs to be fixed up.

PROPOSED REVISION TEXT:

Delete 6.6.1 Control primitives and parameters (which is now covered in 11.4 of
802.1AC-Rev), and 6.7.1 Support of the Internal Sublayer Service by IEEE Std 802.3 (CSMA/CD)
(which is now covered at the end of 12.1 of 802.1AC-Rev).

Change the references to 6.6.1 to references to 11.4 of 802.1AC-20XX in 6.8.4, 12.26.1,
36.1.2, M.1.
Change any references to 6.7.1 to references to 12.1 of 802.1AC-20XX.  Except there aren't
any at the time of writing.

```
