```

DATE: 22 October 2014  
NAME: Tony Jeffree  
COMPANY/AFFILIATION: Broadcom/HP  
E-MAIL: tony@jeffree.co.uk

REQUESTED REVISION:  
STANDARD: 802.1Q-2014  
CLAUSE NUMBER: 17.7.12  
CLAUSE TITLE: Definitions for the IEEE8021-FQTSS-MIB module

RATIONALE FOR REVISION:

The IEEE8021FqtssTxSelectionAlgorithmIDValue textual convention needs to be updated to include the ETS code point (see table 8-5).

PROPOSED REVISION TEXT:

Include an enumerated value for this, and change the "reserved" values, as shown:

- 2: Enhanced Transmission Selection algorithm
- 3-255: Reserved for future standardization.

IMPACT ON EXISTING NETWORKS:

Minor - the use of the right value will have the desired effect even without changing the definition of the TC. The main impact is on display.
