| IEEE 802.1 REVISION REQUEST 0147                                 |
+------------========================================--------------+
```

DATE: 04 November 2014
NAME: John Messenger
COMPANY/AFFILIATION: ADVA Optical Networking Ltd
E-MAIL: JMessenger@advaoptical.com

REQUESTED REVISION:
      STANDARD: 802-2014
      CLAUSE NUMBER:
      CLAUSE TITLE:

    Provide a detailed description about the various categories of network resources, their
    registration authorities and the agreements this authorities refer to.

RATIONALE FOR REVISION:

    This maintenance request originates from the China National Body comment on the 60-day
    pre-ballot on the submission of
    IEEE Std 802-2014 under the PSDO.

    This proposed project provides an overview to the family of IEEE 802 standards. IEEE 802
    standards are involved with many
    types and large numbers of network resources, including EtherType number, information
    element, OID, reason code, etc.
    We believe it is necessary to manage them by a feasible and effective method. However,
    the fact is that some of them are
    specified, while others are not entirely clear who and on what base is administrating
    these network resources.

IMPACT ON EXISTING NETWORKS:
