| IEEE 802.1 REVISION REQUEST 0160 |
+-----+

```

DATE: 30 April 2015
NAME: Pat Thaler
COMPANY/AFFILIATION: Broadcom
E-MAIL: pthaler@broadcom.com

REQUESTED REVISION:
STANDARD: IEEE 802.1Q-2014
CLAUSE NUMBER: 8.7.3 and others
CLAUSE TITLE: Ageing of dynamic filtering entries

RATIONALE FOR REVISION:

Ageing is spelled ageing in most of the standard (34 instances), but it is spelled aging in Clause 17 (and once in Annex P). This makes it difficult to find the linkage between the MIB objects for aging and the related text in the FDB sections.

PROPOSED REVISION TEXT:

Change all instances of "ageing" to "aging" - though there are more of the former, aging is in MIB Object names

If we want to maintain the use of ageing not change MIB object names, at least provide a bridge between them such as mentioning the object name in 8.7.3 or adding a note to indicate that ageing is spelled "aging" in the MIB.

IMPACT ON EXISTING NETWORKS:

None
