

Tentative Minutes of the IEEE P802.11 Working Group

**Interim meeting
Salt Lake City, UT
May 8-11, 1995**

Monday, May 8, 1995, 8:40 AM

The meeting was called to order at 8:40 AM, Vic Hayes, chairman IEEE P802.11¹⁾ in the chair. Lee Goldberg accepting to take notes. Stuart Kerry managing document originals and copying, Jon Rosdahl managing distribution and pigeon hole organization. Leon Scaldefferri handling the attendance list. The agenda document for this meeting is 802.11-95/36.

Objectives for this meeting

To resolve the remaining issues from the letter ballot on D1.

¹⁾The officers of the Working Group are:

<p>Mr. VICTOR HAYES Chairman IEEE P802.11 AT&T Wireless Comms & Netw. Div. E-Mail: Vic.Hayes@Utrecht.ncr.com Phone: +31 3402 76528 Fax: +31 3402 39125</p>	<p>Mr. John McKown Vice Chairman IEEE P802.11 Motorola E-Mail: mckown@wes.mot.com Phone: +1 708 538 5235 Fax: +1 708 538 5251</p>	<p>Ms. Carolyn Heide Secretary IEEE P802.11 Spectrix Corp. E-Mail: 71041.3262@compuserve.com Phone: +1 708 491 4534 Fax: +1 708 467 1094</p>
---	--	---

<p>Mr. STUART KERRY Vice Chairman IEEE P802.11 Symbol Technologies Inc. E-Mail: stuart@psd.symbol.com Phone: +1 408 369 2634 Fax: +1 408 446 4630</p>	<p>Mr. JON WALTER ROSDAHL Vice Chairman IEEE P802.11 Novell Inc. E-Mail: jrosdahl@novell.com Phone: +1 801 429 3183 Fax: +1 801 429 7232</p>	<p>Mr. LEON SCALDEFERRI Vice Chairman IEEE P802.11 NSA E-Mail: lsscald@alpha.ncsc.mil Phone: +1 301 688 0293 Fax: +1 688 0289</p>
--	---	--

<p>Mr. DAVE BAGBY Chair IEEE P802.11-MAC group Advanced Micro Devices Phone: +1 408 987 2423 Fax: +1 408 987 2800 E-Mail: david.bagby@amd.com</p>	<p>Mr. JIM McDonald Vice-Chair IEEE P802.11-PHY group Motorola Inc. Phone: +1 708 576 3169 Fax: +1 708 576 8585 E-Mail: jim_mcdonald@wes.mot.com</p>	<p>Mr. BOB O'HARA Editor IEEE P802.11 Advanced Micro Devices Phone: +1 408 987 2421 Fax: +1 408 987 2814 E-Mail: bob.ohara@amd.com</p>
--	---	---

Mr. GREG ENNIS
Editor IEEE P802.11

Phone: +1 408 356 4775
Phone: +1 408 356 4775
E-Mail: gennis@netcom.com

1. Opening

1.1 Roll Call: People in the room were invited to introduce themselves.

1.0 Secretary: Lee Goldberg took meeting notes and Vic Hayes prepared the minutes.

1.2 Voting rights:

Voting at the working group level is by voting members only. Chair may permit observers to participate in debate. To become a voting member:

- participate in at least 2 out of 4 consecutive plenary meetings. Voting rights start at third meeting
- participation in at least 75% in meetings, in the room
- one interim may be exchanged for a plenary
- Voting members will get a token to be used at votes

Voting rights can be maintained:

- by participation in 2 plenary meetings within 4 consecutive plenary meetings
- one interim may be substituted for a plenary

Voting rights may be lost:

- after failing to pay the conference fee
- after missing two out of three consecutive letter ballots

Current status:

97	Voting members
6	Voting membership lost
14	Nearly Voting members
42	Aspirant Voting members

1.3 Attendance list, Registration: The attendance list was distributed - 75% attendance according to the attendance list is required to qualify for attending the meeting as a whole, so make sure to sign the book. Copies of the attendance list are handed out before the end of each meeting.

- important for administration of voting rights that the attendance book is used properly.
- sign per meeting (morning, afternoon, evening)
- place initials. Do not cross or underline.

Check Email addresses: please check your email regularly. Please strike your address if its no longer valid.

Reflector inoperable: the reflector has been out of service for at least two weeks. The chair indicated there is a large queue waiting to be sent to the membership. One of the messages being a straw poll on switching from Word for Windows V 2.0 to 6.0. Some members noted other problems with V 6.xx and issues of compatibility with MAC machines.

1.4 Logistics: Document distribution is done using pigeon holes - you will find your copies and messages in the referenced location in the expanding file folders in the slot *in front of* your name.

Document distribution:

- sign in for a slot, remember the letter and number
- pigeon holes are file folders with a letter id on each folder and a number on each slot
- in each folder are numbered slots, each of which is 'owned' by a person
- each person owns slot in front of number

Coffee breaks at 10 AM and 3 PM. Lunch noon to 1 PM

1.5 Other announcements

1.5.1 Apology received from Barry Dobyns: He offers regret to Jon Rosdahl, editors team and members with interest in IR group. Subject to finding a sponsor by July he will resign voting membership. There is a need to find another leader for IR group for this meeting at least. As there is only 1 person interested in IR matters and the IR group had already finished their task for resolving negatives, no IR meetings are needed this week.

1.5.2 The chair received a request from the **InterOperability Lab of the University of New-Hampshire** for presentation on their possible assistance in making test specification. See proposed agenda under new business on Tuesday afternoon.

1.5.3 Result of ballot on new chapters and FH motions

Tentative report

To date ballot received from 63 voting members (64 % of voters)

Section/motion	percentage approval	percentage abstaining
1 & 2	75.9 %	7.9
3	96.4 %	12.7
4	94.2 %	17.5
5.1 & 5.2	100 %	14.3
5.4	100 %	17.5
5.5 & 5.6	100 %	15.9
7.1	96.4	11.1
10	100	22.2
11	100	27
12	100	36.5
m1	75	16.1
m2	80	19.4
m3	79	6.21
m4	82	19.4

The low approval rate of sections 1 and 2 were caused by the addition of a paragraph leading to a single PHY support. Dave Bagby apologizes for the editing mistake, the MAC group will correct the error.

With the uncertainty of late incoming ballots that were sent by snail mail 802.11 passed a motion by unanimous consent to operate on the assumption that all items passed. Dave Bagby suggests to declare the closure date as the date of receipt in the chair's office in stead of the date of sending. This would need to be decided by the group each time it would ask for a ballot.

Dave Bagby requests for an updated D1 to D1.1. The editor could not warrant a practical delivery time and it was agreed to work from separate sections D1.1 which will be prepared and distributed by Bob O'Hara as soon as possible.

1.5.4. Workshop WINForum/Federal User Forum: will be held week after this meeting. As the chair is involved in the workshop, the mailing will be prepared immediately after closure of the meeting.

1.5.5 Larry Zuckerman's paper on procedures: Wayne invites discussion on subject paper. The chair indicates that such should be done under new business.

2. Approval of the minutes of the previous meeting

2.1 West Palm Beach meeting, Document IEEE P802.11-95/32: postponed approval due to lack of quorum.

2.2 Matters arising from the minutes: none.

3. Reports

3.1 The Executive Committee, by Vic Hayes. The ExCom passed a motion that all letter ballot would have a minimum time of 30 days. As the rules state that Operating Rule changes needs to be decided over a plenary to plenary time, said motion needs to be re-approved until the official rules change would be adopted.

3.2 The Editors, none

3.4 The Letter Ballot Results of the March meeting results by Vic Hayes

Refer to agenda item 1.5.3.

3.5 San Jose meeting finances, second time approval had to be delayed. Chair did receive the overview, but did not get the exhibits, nor did the present host receive the balance.

3.6 The Letter Ballot Results from San Jose meeting, by Vic Hayes

See section 1.5.2

4. Review of Contributions: document list is document 95/87. Members announced submissions until 95/86.

5. Adoption of Agenda for Monday: The following new business items were added as result of announced contributions:

PHY Conformance	95/05
MAC/PHY interface	95/16
Voting procedures	95/37
Product Labeling	95/41
Parameters IFS	95/81,86
Conformance	95/82 83

The agenda, as modified, was approved by unanimous consent.

6. Unfinished Business: none

7. New Business:

7.1 PHY Conformance: This item is delayed till after the InterOperability Lab presentation.

7.2 MAC/PHY interface This item is delayed due to late arrival of paper.

7.3 Voting procedures This item is delayed due to late arrival of paper.

7.4 Product Labeling John Sonnenberg introduced document 95/41 titled Product Labeling (John Sonnenberg, Pulse Engineering, and Wayne Moyers, Consultant). He showed a possible motion.

A discussion ensued whether so many variables need to be defined. The relation with conformance and the conformance test suite definition designed to provide consistent compliance evaluation which does not permit vendors to take advantage of ambiguities in the specification was raised. The attention was also drawn to the requirement of a good standard to bring the number of options to the minimum. Questions were raised on whether simpler 802.11 devices (such as printers without access to many signals) would be subject to the same compliance test specification.

Questions were raised about the desirability of setting minimum performance standard.

The goals of product labeling were seen as:

1. to match the Physical Layer
2. to allow consumers to select and match power level,
3. reduce interference,
4. notify user about energy levels.

Labeling came mostly favourable out of the discussion. Questions were raised about whether product or package should be marked. The power classes proposed were:

1. <200 mW
2. < 400 mW
3. > 400 mW

It was argued that this was a marketing function, not appropriate for specification.

The chair proposed to defer labeling to give John a chance to resubmit his paper taking the comments into consideration. To help John, straw polls were taken for each of the sections of the proposed motion. The following is the result in the format **support**, **oppose**, abstain all present permitted to participate.

section 1, type designation as stated: 11, 14, 13

section 2, power level as stated: 3, 25, 7

section 3, safety notices, 7, 26, 6

section 4, FCC identifier, 6, 30, 9

section 5, compatibility with other products, 5, 18, 8

section 6, power class recommendation, 3, 27, 5

The overall support of labeling, 30, 3, 7.

Some dissension about labeling on the product itself was voiced. For labeling on enclosure 9, for labeling on selling box: 6. These counts includes counts on both.

7.5 Parameters IFS This item is delayed due to late arrival of paper.

7.6 Conformance This item is delayed due to late arrival of paper.

8. Adjourn for subgroups - 6:50 PM

Tuesday, 9 May, 1995, AM MAC subgroup & PHY-FH, PHY-DS ad-hoc groups

Tuesday PM, 9 May, 1995 Full Working Group

The meeting was reconvened at 1:05 PM, by chairman Vic Hayes, with Lee Goldberg note-taker.

9. Opening 1:00 PM

9.1 Roll Call People in the room were invited to introduce themselves.

9.2 Document list update Stuart Kerry gave an update on the availability of documentation.

9.3 Agenda adjustments under old business the Voting procedures (doc 37), Parameters such as IFS, docs. 81 and 86, and Conformance (docs. 82 and 83).and under new business: InterOperability Lab, PHY Conformance (doc 5). The agenda was approved as modified by unanimous consent.

9.4 Announcements

9.4.1 How many documents expected for mailing: the chair asked an estimate of the amount of documents available at the end of this week to plan the work to get the mailing out from this hotel, due to other commitments the week after the meeting. He also asked for assistance Thursday evening and night.

9.4.2 Logistics: none

9.4.3 Chairless PHY group: the PHY group lost its chair, Larry van der Jagt, due to loss of membership for not returning ballots. Vice-chair of the PHY-group, Jim McDonald, has already replaced Larry van der Jagt for quite some time and had agreed to consider the acceptance of the full chairmanship. In the meantime, Jim will be added to the list of officers of 802.11 on the front-page of the minutes of the full Working group as vice-chair, PHY subgroup.

9.4.4 Power Supply: Jim McDonald indicated that he still had a power supply, found in one of the meeting rooms in West Palm Beach.

10. Old Business

10.1 Void

10.2 VOTING PROCEDURES - Document 37 with Larry Zuckerman This presentation proposed a novel weighted voting system intended to eliminate the sudden death of potentially good compromise choices which occurs in situations where more than two choices are presented. One part of the weighting system would be factored on seniority, i.e. the length of time a member has actively been involved. It was acknowledged that this might be impractical to implement at this late date. Another key concept is allowing members to vote for vote for more than one candidate.

10.3 PARAMETERS FOR PIFS, IFS, DIFS - Document 81 with Chris Zegelin. This proposal unifies the timing parameters between all 3 MACs, no intent to modify the specs. Corrections and updates only - no changes, except for clarity and consistency.

Motion #1: To unify the timings provided in the PHY sections of the document with those used by the MAC, by adding the new text from 95/81

Moved by: Chris Zegelin
Seconded by: Sarosh Vesuna

Motion Discussion: much ado about nothing.....

Motion 1.1: to postpone vote until after Wim D's paper

Moved by: Ed Geiger
Seconded by: Wayne Moyers

Approved: 36 Opposed: 1 Abstain: 0 **Motion #1.1 passes**

IFS TIMING SPECIFICATION - document 86 presented by Wim Diepstraten. It was not appropriate to make a motion to adopt the subject matter because the paper was not yet available.

Motion 2: To refer the subject to ad-hoc to come with text etc. as soon as the paper has been distributed, and come to the plenary with the result; start 8:30, leader Ed

Moved by: Ed Geiger
Seconded by: Wayne Moyers

Approved: 36 Opposed: 0 Abstain: 1 **Motion #2 passes**

10.4 CONFORMANCE - Document 82 with Chris Zegelin. Proposed that all conformance measurement be done at the air interface. Praise for the concept but reservations about the specific wording.

Motion 3: to define the point for measuring compliance to all characteristics of the 802.11 standard as the 'air' interface for the product, and that no physical attachment be used to measure compliance. This accomplished by adding the new text from document 95/82 into the draft standard.

Moved by: Chris Zegelin
Seconded by: not registered

Motion 3.1: to call the question

Approved: 36 Opposed: 0 Abstain: 0 **Motion #3.1 passes**

Approved: 10 Opposed: 14 Abstain: 4 **Motion #3 fails**

Chris Zegelin continues with introducing document 83 **PRODUCT CONFORMANCE TO MIB**. Proposal is that MIB is only exposed at the choice of manufacturer who has option of exposing only a subset for conformance verification - depending on application.

Motion 4: *to remove any confusion about requiring an exposed MIB interface for any specific product, the following new text will be included in the draft standard. This accomplished by adding the new text from document 95/83 into the draft standard..*

Moved by: Chris Zegelin
Seconded by: not registered

Motion 4.1: *to call the question*

Moved by: Bob O'Hara
Seconded by: not registered

Approved: by voice vote.

Motion #4.1 passes

Approved: 3

Opposed: 20

Abstain: 7

Motion #4 fails

11. New Business

11.1 **INTEROPERABILITY LAB PRESENTATION** with Barry Reinhold of the University of New Hampshire.

Information can be obtained from WWW.IOL.UNH.EDU. The presentation will be made available in electronic form. Idea is to provide brainpower for conformance testing via consortia for each subject. Members of the consortia would provide funding for whatever they specify the university to do, including looking at the standard, commenting where it would be ambiguous, or to prepare testbeds.

Interest ran high, it was suggested that an exploratory meeting be held at UNH.

Reinhold offered his email address - bbr@unh.edu for any interested party who wishes to pursue the possibility of forming an interoperability consortium.

11.2 **PHY CONFORMANCE:** document 05. Postponed

Adjourn - 5:05 PM

Wednesday, 10 May, 1995

MAC subgroup & PHY-FH, PHY-DS ad-hoc groups

Thursday AM, 11 May, 1995

MAC subgroup & PHY-FH, PHY-DS, PHY-IR ad-hoc groups

Thursday PM, 11 May, 1995
Full Working Group

The meeting was reconvened at 1:15 PM, by chairman Vic Hayes, with Johnny Zweig note-taker.

14. Opening

14.1 Announcements/Domestic Items:

14.1.1. Software versions and e-mail document distribution - Vic Hayes reported the results of Straw Poll on Electronic Document Distribution Formats:

Microsoft Word files in version 6.0c

I do agree, I work in that version	25
I do agree, I will buy the new version	0
I do agree, I can view that version	1
I do agree, I can convert to/from that version	0
I do NOT agree	3

Reasons given for I do NOT agree:

- but I can view
- Word 6 seems to have a lot of problems
- Word 6.0 for the MAC is
 - 1 unreliable
 - 2 incompatible with most other MAC software
 - 3 slow
 - 4 can clobber hard disk file structure while doing nothing but opening files and printing
- I would like to be able to vote for never sending documents in Word 6 format

Powerpoint files in version 4.0a

I do agree, I work in that version	24
I do agree, I will buy the new version	0
I do agree, I can view that version	0
I do agree, I can convert to/from that version 1	0
I do agree, provided an alternative is sent in RTF	0
I do NOT agree for the following reason	6

Reasons given for I do NOT agree:

- I cannot print any PPT files
- Powerpoint for the MAC is larger & slower than the 3.0, with few if any discernible advantages. V3.0 cannot open V4.0 files
- I do not have space for 4.0 on my notebook, so I would prefer 3.0 files - but there are less reasons than Word 6.0

by e-mail AND on FTP servers only (do not mail documents)

I do agree	10
I do NOT agree	15

Reasons given for I do NOT agree:

- speed of downloading is low over tel. lines. Diskettes work fine for me
- one diskette per company/ e-mail is not reliable
- e-mail and FTP not reliable
- unreliable
- e-mail is not 100 % reliable. It should be incorporated, but snail-mail should still be an option
- very frequently our internet connection is down, e-mail is vary unreliable
- FTP plus diskettes fine, paper not needed

maintain just a single mailing list (get rid of bulk list)

- I do agree, remove the bulk list 23
- I do NOT agree with receiving files larger than 4 pages 6

Vic will send out a letter ballot proposing that we go to 1 copy mailed per company, Word version 6, PowerPoint version 3.

14.1.2 Financial report SLC

Jon Rosdahl. Thanks to AT&T, Novell, Photonics, Xircom for providing equipment for the temporary network. Thanks to the members for attending. Meeting budget came to \$9800. [95/108] will detail finances. Photocopying was \$480 @\$0.04/page. Apologies for the bills showing \$99/day rather than \$70+\$29 per day. The registration charge was reduced to \$40 (from \$60), and is itemized separately on hotel bills.

The chair thanks Jon for bringing us to the excellent facilities so well organized. Acclamation.

14.2 Document List Update: everybody give electronic copies to Stuart Kerry.

14.3 Agenda Adjustments: added report of the ad-hoc group IFS definition/timing and labeling under old business. Agenda, as modified, adopted by unanimous consent.

15. Reports

15.1 MAC Group, by Dave Bagby

Goals were to incorporate D1 LB comments. Approved March MAC minutes. April LB results incorporated. Most D1 comments were processed. [95/14] will offered as part of a letter ballot so members have time to review. [95/16] withdrawn. [95/80] resulted in a motion that was not passed (3 in favor, 11 opposed, 5 abstain) *so a* straw poll to determine which CW sizes members preferred (5 wanted less than 8 slots; 5 wanted 8 slots; 8 wanted 16 slots, 3 wanted 32 slots, none wanted more than 32 slots). There was also a straw poll on whether CAW should be PHY dependent, with 9 votes in favor, 1 opposed, 11 abstaining. Finally, a straw poll was conducted to consider Tom Tsoulogiannis' proposal that a dynamic approach be used (algorithm TBD) to adjust CW dynamically. This failed, with 0 in favor, 7 opposed, 12 abstaining.

Technical highlights:

Sec 1, 2, 3, (some of) 4, 5.4 considered by a special Security subgroup. MAC recommends adoption of [95/95] and [95/96] to complete all technical D1 LB comments.

Motion #5: *That 802.11 adopt the changes described in these slides by adopting the corresponding detailed text changes from document 95/96. (MAC vote was 13 1 3)*

Moved by: David Bagby for the MAC subgroup
 Seconded by: Michael Fischer

Motion Discussion: none

Approved: 22 Opposed: 0 Abstain: 5 **Motion #5 passes as recommendation**

Motion #6: *That 802.11 conditionally adopt RC4 as the WEP PRNG algorithm, provided that the following conditions are satisfied:*
 1) *RSA to send a letter to IEEE satisfying the requirements for "fair and equitable" availability of RC4 before the July 1995 IEEE 802 meeting.*
 2) *RSA to further state in a letter to IEEE that it will make RC4 available under terms that are identical for anyone who wishes to use RC4 for an 802.11 WEP implementation*
 3) *RSA specifies licensing terms for 802.11 WEP implementations which include at least the following scenarios:*

- little or no fee up-front, with a per-unit royalty
- a one time, per-company fee, with no per-unit royalty
 (MAC vote was 18 in favor 2 opposed 1 abstain)

Moved by: The MAC subgroup
 Seconded by: Michael Fischer

Motion Discussion: none

Approved: 22 Opposed: 0 Abstain: 4 **Motion #6 passes as recommendation**

Section 3. All D1 LB comments dealt with except missing 3.2.2 which Tom Siep will write and submit for LB before July in document [95/113]. Proposed D1.2 text in document [102] will be in May LB mailing. 802.10 references were removed, and the section was rearranged/consolidated. Place holders were re-inserted for text that is to be written.

Sec 4. D1 comment tables updated. Most changes drive by other groups. 116 will be in May LB

Sec 5. 5.0-5.2 already incorporated in D1.1 -- some comments not processed yet. All 5.3 comments processed. Superframe was removed. Beacon and CF periods were set to integral multiples and synchronized. CF is not confined to a single medium occupancy. CF period begins with a DTIM. 5.4 covered by security group. 5.6 and 5.6 already covered I D1.1. 5.7 5.8 state machines will be replaced by text to be sent out in May LB.

Sec 7. Power Management updated. Association updated. [106] will be submitted in May LB. [95/117] will submit a new section 7 re-association section to go out in second (June?) mailing.

Goals for July meeting: Send D1.3 MAC chapters for 802.11 LB approval to forward to Sponsor ballot. Operating rule will be "no putting decisions off" to ready the draft for sponsorship.

Open sections from D1 LB:

Section 3.2.2 to be added

Section 4: most D1 comments processed. Mgmt frame format for connection services and connection elements

Section 5: Multi-rate comments and RTS/CTS usage and fragmentation to be addressed. 5.7 not yet addressed but will be

Section 6: Empty now, will be created in [95/118] before July meeting. We need input from each of the PHY groups. Dean Kawaguchi (volunteered by Chris) for FH group; Jim McDonald and Ed Geiger will coordinate obtaining additional bodies (from IR group, for instance); Mike Trompower for DS group.

Section 7: All D1 comments for 7.2 and 7.3 addressed. 7.1 still has some comments unresolved from before D1.1 was prepared. MIB review will happen in July.

Any TBDs left after June LB will be filled in during July meeting.

Discussion: Do security changes to disentangle from 802.10 violate our charter? No. The changes make it unambiguous that WEP operates at the MAC layer and 802.10 operates above it.

Dave and Vic will cooperate to get RSA to send the properly-worded letter to the appropriate IEEE responsible individual. Note that RSA algorithm itself is only available from RSA; for legal reasons, it cannot be published, so 802.11 will indicate how to obtain the algorithm from RSA.

15.2 PHY group

DS group resolved all D1 LB comments -- scrambler, turnaround timing, CCA. MIB refinements were resolved together with FH group. Resolution to be described in [95/119] in May LB mailing; revised text [95/123] in June mailing.

FH group resolved 90% of comments. MIB, 10.4 and 10.5 still need to be addressed. Parts per million drift on data rate is TBD.

MIB made significant progress. Definitions clearer and common amongst all PHYs. Consistent with recommendations of IFS Timing ad-hoc group. Clarified 2.0 Mbit/s option. RSSI format defined but its use is optional. IM and Desensitization specs refined.

Issues: Japanese power and call sign transmission requirements. CCA with random data. Beacons (should their timing be related to dwell time?). MAC support for multiple data rates not yet resolved. FER (frame error rate) used instead of BER for several specifications, and the conversion between FER and BER that is to be resolved.

Documents: [95/77a] will go in May LB. [95/124] to go out in June LB with revised text. Separate motions will be required for FER/BER and aMPDU_Maximum_length_2Mbit/s.

- 15.3 Ad-hoc IFS definition/timing group** Wim Diepstraten. Came to conclusion that [95/86a] fairly represents what is need for correct PHY and MAC operation. Text has been generated [95/121] which will go out in May LB mailing.

16. Unfinished Business

16.1 Recap of Output Documents: there are none.

16.2 Recap of Document Distribution: All documents OK for distribution, except attendance list which will only be given to attendees.

16.3 Labeling

John Sonnenberg. Reworked text from the proposal of Monday.

Motion #7:

To add the following to a new section in the draft standard.

X.XX.X Media Access Unit (MAU) labeling.

Each product (and supporting documentation) claiming conformance to the P802.11 standard shall include the following information regarding the MAU:

1. 802.11 Type Designator

At least one of the following 802.11 LAN type designators. These indicate the technology used within the MAU.

802.11-DS

For DS implementations

802.11-FH

For FH implementations

802.11-IR

For IR implementations

Motion Discussion:

Motion #7.1:

to reword motion so it says “product or supporting documentation”

Moved by:

Chris Zegelin

Seconded by:

Larry Zuckerman

Discussion: Chris Zegelin: to avoid having to label the physical item itself. Jon Rosdahl thinks labels are so useful that they should be required on the unit. Wayne Moyers agrees with Jon. Johnny Zweig disagrees, since buyer can decide whether to buy unlabelled units. Chris Z wants to be able upgrade handheld units without having to put stickers on the boxes. Stuart K agrees with Chris. Jeff Abramowitz agrees with Chris and Johnny that unit labeling is a product marketing, not a standards issue.

Motion #7.1.1: to omit parenthetical comment and “regarding the MAU

Discussion: Dave Bagby: so that the text will not specify how the information is communicated. Jon Rosdahl seconds.

Discussion of amended amendment: Greg says that we don't have a MAU defined in our standard. So the title is misleading. Dave corrects his proposed amendment to the amendment accordingly and now reads.

Motion #7:

To add the following to a new section in the draft standard.

X.XX.X ~~Media Access Unit (MAU) labeling.~~

Each product (~~and OR supporting documentation~~) claiming conformance to the P802.11 standard shall include the following information ~~regarding the MAU~~:

1. 802.11 Type Designator

At least one of the following 802.11 LAN type designators. These indicate the technology used ~~within the MAU~~.

<i>802.11-DS</i>	<i>For DS implementations</i>
<i>802.11-FH</i>	<i>For FH implementations</i>
<i>802.11-IR</i>	<i>For IR implementations</i>

Approved: 23 Opposed: 0 Abstain: 1 **Motion #7.1.1 passes**

Motion 6.1 (to amend) is still on the floor.

Approved: 22 Opposed: 0 Abstain: 3 **Motion #7.1 passes**

Motion #7.2: *to delete the word "LAN"*

Moved by: Jim McDonald
 Seconded by: not registered

Motion by carries by unanimous consent.
