Travel to the Spain

Please take the necessary steps to determine if you need travel documentation for attending an upcoming IEEE 802 Session. Travel requirements may change periodically, so we strongly encourage all attendees to review the specific entry requirements for each session location. You should assess these requirements either on your own or in consultation with your employer to determine what, if any, travel documentation is necessary.

Local regulations, restrictions, and guidelines may change over time, and IEEE recommends consulting your country's consulate or Spanish consular representative for the most current travel information.

Entry Requirements and Documentation Applications

For detailed information about entering Spain, please visit the following link: [Conditions for Entry to Spain](#)

European Travel Information and Authorization Applicability ([ETIAS](#))

[ETIAS](#) is required for travellers from visa-exempt countries who intend to enter any of the 29 Schengen countries, including Spain.

Application Process: The application is completed online and involves providing personal information, travel details, and answering security-related questions. The process is designed to be straightforward and should take only a few minutes.

Fee: There is a fee of €7 for the application, which is waived for travellers under 18 and over 70 years old.

Validity: Once approved, the ETIAS authorization is valid for three years or until your passport expires, whichever comes first. It allows for multiple short-term stays of up to 90 days within any 180-day period.

IEEE Letter of Invitation

A link to a Letter of Invitation will be included in your confirmation email once your registration and payment are processed.
