Patent Policy and Procedures	The contributor is familiar with the IEEE 802.16 Patent Policy and Procedures <http://ieee802.org/16/ipr/patents/policy.html>, including the statement "IEEE standards may include the known use of patent(s), including patent applications, provided the IEEE receives assurance from the patent holder or applicant with respect to patents essential for compliance with both mandatory and optional portions of the standard." Early disclosure to the Working Group of patent information that might be relevant to the standard is essential to reduce the possibility for delays in the development process and increase the likelihood that the draft publication will be approved for publication. Please notify the Chair <mailto:chair@wirelessman.org> as early as possible, in written or electronic form, if patented technology (or technology under patent application) might be incorporated into a draft standard being developed within the IEEE 802.16 Working Group. The Chair will disclose this notification via the IEEE 802.16 web site <http://ieee802.org/16/ipr/patents/notices>.

1. Introduction

In Section 14.2.2.2, service primitives are defined for accounting management. However, it does not follow service primitive template, which is defined in Section 14.1. Thus, we modify Section 14.2.2.2 based on the service primitive template.

2. Proposed Text Changes

[Modify section 14.2.2.2.1.2 as follows]

14.2.2.2.1.2 Semantics of the service primitive

The parameters of the primitives are as follows:

M-ACM-REQ
(
Message_id,
Operation_type: Action,
Action_type: null,
Object_ID: BS_ID or NCMS,
Attribute_List :
      MS MAC Address
      Service Flow Identifier
      Accounting Record Type
      Accounting Record Number
      Accounting Input Octets
      Accounting Output Octets
      Accounting Input Packets
      Accounting Output Packets
      Service Flow Information
)
