Re:	
Abstract	Solicitation for input to the 10-66 GHz Profiles Task Group (TGc) meeting in May
Purpose	Facilitate rapid development of the amendment to the air interface specification.
Notice	This document has been prepared to assist IEEE 802.16. It is offered as a basis for discussion and is not binding on the contributing individual(s) or organization(s). The material in this document is subject to change in form and content after further study. The contributor(s) reserve(s) the right to add, amend or withdraw material contained herein.
Release	The contributor grants a free, irrevocable license to the IEEE to incorporate material contained in this contribution, and any modifications thereof, in the creation of an IEEE Standards publication; to copyright in the IEEE's name any IEEE Standards publication even though it may include portions of this contribution; and at the IEEE's sole discretion to permit others to reproduce in whole or in part the resulting IEEE Standards publication. The contributor also acknowledges and accepts that this contribution may be made public by IEEE 802.16.
Patent Policy and Procedures	The contributor is familiar with the IEEE 802.16 Patent Policy and Procedures (Version 1.0) < <u>http://ieee802.org/16/ipr/patents/policy.html></u> , including the statement "IEEE standards may include the known use of patent(s), including patent applications, if there is technical justification in the opinion of the standards-developing committee and provided the IEEE receives assurance from the patent holder that it will license applicants under reasonable terms and conditions for the purpose of implementing the standard."
	Early disclosure to the Working Group of patent information that might be relevant to the standard is essential to reduce the possibility for delays in the development process and increase the likelihood that the draft publication will be approved for publication. Please notify the Chair <mailto:r.b.marks@ieee.org> as early as possible, in written or electronic form, of any patents (granted or under application) that may cover technology that is under consideration by or has been approved by IEEE 802.16. The Chair will disclose this notification via the IEEE 802.16 web site http://ieee802.org/16/ipr/patents/notices>.</mailto:r.b.marks@ieee.org>

Call for Contributions:

IEEE 802.16 Task Group c on 10-66 GHz System Profiles

IEEE 802.16 Session #19

20-24 May 2002

During its Session #18, IEEE 802.16 Working Group on Broadband Wireless Access (with the approval of the IEEE 802 LAN MAN Standards Committee) initiated a Task Group on 10-66 GHz System Profiles. This 802.16 Working Group will meet in conjunction with 802.16's Session #19 (20-24 May 2002 in Calgary, Alberta, Canada).

This Call for Contributions requests input to further the work of the Task Group. In particular, contributions are solicited on the following topics:

- Content of Chapter 12 of the air interface specification regarding 10-66 GHz system profiles.
- Errata to IEEE Standard 802.16.

Contributions will be considered non-confidential and will be posted for public access on the 802.16 Web Site http://WirelessMAN.org>.

Submit your contribution by the **deadline of 7 May 2002** following the instructions at <<u>http://WirelessMAN.org/submit.html</u>>.

For further information, contact either of the following:

- Task Group Chair: Ken Stanwood <ken@ensemble.com>
- IEEE 802.16 Working Group Chair: Roger Marks <marks@nist.gov>
