General Discussion

- Presentation was marked up to reflect Ad hoc discussion, and will be uploaded to the ad hoc meeting webpage.
- General agreement on terminology on slides 6 & 7, but further discussion on Slide 8. Chair asked individuals to work offline with him to come back for the next ad hoc meeting with updated proposed terminology for Slide 8.
- D'Ambrosia proposed noting that all links in this study group would be point-to-point links and would not include point-to-multipoint.
- Mr. Law noted that the proposed changes to “link” may cause issues, as there is substantial terminology built around its use in 802.3, and this may cause problems when reflecting the output of the SG to the broader 802.3

Meeting adjourned 11:00am.
