

RF Spectrum Ad Hoc – Minutes June 4, 2013

Provided the IEEE-SA Patent Policy link. Everyone on the call was familiar with the patent policy.

- <https://development.standards.ieee.org/myproject/Public/mytools/mob/slideset.pdf>

Everyone on the call was familiar with the IEEE patent policy.

We reviewed eStraw Polls that were held last week

Some suggested next steps,

- Specify the purpose of the internal exclusion sub-bands
- Determine if the channel has both RMS and PSD power limits
- Hold a straw poll asking if there is support for no limit on the spectrum covered by the exclusion sub-bands, as long as there is the remaining 24 MHz continuous spectrum
- Clean up the language on the frequency bands so people are clear that the PHY must support the entire specified frequency band

Straw Poll

The standard will specify an FDD upstream frequency band with a lower and upper band edges. A PHY will be required to support the entire FDD upstream frequency band.

The FDD upstream lower frequency band edge supported by the PHY should be,

5 MHz	8
10 MHz	0
15 MHz	0
Other	0

The Ad Hoc requests that the TF chair run an eStraw Poll on the above straw poll.

Attendance

Person	Affiliation
Michel Allard	Cogeco Cable
Hesham ElBakoury	Huawei
Bill Keasler	Ikanos
Mark Laubach	Broadcom
Bill Powell	Alcatel Lucent
Duane Remein	Huawei
Steve Shellhammer	Qualcomm
Joe Solomon	Comcast
