Straw Poll
What is the approximate maximum duration of the TDD downstream time window that can be provisioned? The exact value will be in multiples of symbols+cp.
- 1 ms   1
- 2 ms   1
- 5 ms   0
- 10 ms   4
- Other   0
- Abstain   2

Hold off on eStraw Poll these straw polls. We need to discuss them more.

Next week, we can discuss provisioning which is one aspect and also what equipment needs to support, which is another aspect. We will likely straw poll these separately.
