

Approved Meeting Notes

IEEE P802.3bs 200GbE and 400GbE Task Force

Ad Hoc Teleconference Call, 15 June, 2016

Minutes taken by John D'Ambrosia, Futurewei, Subsidiary of Huawei

Meeting started at 8:05am (EDT)

Chaired by John D'Ambrosia

The attendee list was taken from the Webex attendee list plus any email notifications of attendance.

Documentation for the call can be found at: <http://www.ieee802.org/3/bs/public/adhoc/tf/index.shtml>

Chair reminded everyone of the IEEE patent policy (<http://www.ieee802.org/3/patent.html>) and asked if anyone was unfamiliar with it. No one responded.

Chair reviewed the agenda of the call (see http://www.ieee802.org/3/bs/public/adhoc/tf/16_0615/agenda_3bs_01_0616_TF.pdf), and noted that today's call was to review the candidate nomenclature that the editorial team would use for generation of a candidate version of D2.0 based on Arabic numbers. The chair noted that any conversation regarding the debate of Arabic vs Roman nomenclature would not be heard until the announced meeting in July.

Presentation #1

Title: P802.3bs Nomenclature
Presenter: Pete Anslow, Ciena
See http://www.ieee802.org/3/bs/public/adhoc/tf/16_0615/anslow_3bs_01_0616_TF.pdf

Discussion

- Chair reiterated final decision of nomenclature will be made at July meeting.
- Chair asked if there were any comments or feedback on the nomenclature proposed. It was also reiterated that the editorial team would not be able to create another version of the document, if another proposed nomenclature candidate was adopted. Comments of support were expressed, and there were no negative feedback expressed.
- Chair noted that the nomenclature issue would be the first item of business on the agenda after opening business at July's Meeting, which would be Monday afternoon and Tuesday morning. The decision will be made on Monday to maximize the amount of time for the editorial team to start preparing the document for consideration for WG ballot at Thursday 802.3 Closing Meeting.

Call ended at approximately 11:35am EDT

Attendees

Peter Anslow, Ciena
Andre Szczepanek, Inphi
John Dambrosia, Futurewei, Subsidiary of Huawei
Steve Trowbridge, Nokia
Kenneth Jackson, Sumitomo
Rick Rabinovich, Ixia
Salvatore Rotolo, ST Microelectronics
Jeff Slavick, Broadcom
Dale Murray, LightCounting
Greg LeCheminant, Keysight
David Malicoat, HP Enterprise
Kent Iusted, Intel
Piers Dawe, Mellanox
Mark Nowell, Cisco
David Ofelt, Juniper
David Piehler, Dell
David Law, HP Enterprise
Peter Stassar, Huawei
Mike Dudek, QLogic
Yasuo Hidaka, Fujitsu
Arthur Marris, Cadence
Mike Li, Altera
Rich Mellitz, Intel
Aananda Kumar, Max Linear
Jeffery Maki, Juniper
Rita Horner, Synopsys
Ali Ghiasi, Ghiasi
Phil Sun, Credo Semiconductor
Gary Nicholl, Cisco
Daniel Koehler, More than IP
Bharat Tailor, Semtech
