

IEEE802.3bt

Use Cases

J. Heath – Linear Technology

Use Cases

- I have noted that a lot of time in 'bt' and its associated Ad Hocs is consumed with disagreements on what Use Cases are relevant for consideration in making decisions.
- The goal of this presentation is to unify our understanding of:
 - Use Case selection by a Task Force
 - How one can promote Use Cases for consideration for the 'bt' Task Force.
- The following is my understanding of conversations relating to Use Cases. I invite clarification by Dot3 members

Use Cases – What a Task Force Does and Does Not Do

- A Task Force does not decide what is and what is not compliant
- A Task Force can and does decide what use cases it will consider as relevant for decision making
- Ad Hocs do not decide what use cases are relevant for decision making
- Ad Hocs can recommend Use Cases for consideration of the Task Force.
