144.3.6.1 GATE description

— *Timestamp*:
This field conveys the content of the OLT's MPCP local time counter (see *LocalTime* variable in 144.2.1.2) compensated for the RTT of the PLID to which the GATE MPCPDU is sent. This field is used for MPCP time synchronization (see 144.3.1.1). This field carries a 32-bit unsigned integer value that represents time in the units of EQT.

144.3.6.5 REGISTER_ACK description

— *Timestamp*:
This field conveys the content of the OLT's ONU's MPCP local time counter (see *LocalTime* variable in 144.2.1.2) used for MPCP time synchronization (see 144.3.1.1). This field carries a 32-bit unsigned integer value that represents time in the units of EQT.
